

Drug Discovery In Pancreatic Cancer

[DOWNLOAD HERE](#)

1: Pancreatic cancer cell line models. 2: Pancreatic cancer xenograft models. 3: Pancreatic cancer transgenic mouse models. 4: Pancreatic cancer zebra fish models. 5: DNA microarray expression profiling. 6: Array CGH profiling. 7: High throughput siRNA. 8: miRNA profiling. 9: Methylation detection and epigenetics. 10: Tissue microarray based IHC and FISH. 11: Spectral Karyotyping (SKY) and M-FISH. 12: Proteomics analysis of serum and pancreatic juice. 13: Glycomics analysis of serum and pancreatic juice samples. 14: Protein arrays for pancreatic cancer research. 15: Vaccines for pancreatic cancer. 16: Molecular imaging of small animals. 17: Development of pharmacodynamic endpoint models for the evaluation of clinical activities of targeted therapeutics. EAN/ISBN : 9781441911605 Publisher(s): Springer, Berlin, Springer, New York Discussed keywords: Arzneimittel, Bauchspeicheldrsenkrebs
Format: ePub/PDF Author(s): Han Haiyong - Grippo, Paul
