Dear Friend, By now, you've probably heard a lot of the internet marketing "gurus" recommend getting what's called "screen-capture software." Screen-capture software allows you to make a video of your computer screen with you talking as the audio. Internet marketers use this software extensively - for example, to demonstrate a service or recommend a eBook they wrote or even are just an affiliate of. So what? Well, videos are POWERFUL on the internet. They allow you to "rise above the noise" of words and emails and allow you to be more personal with your visitors or subscribers! John Reese, Frank Kern, and many other marketers have personally accredited this tool to making them thousands of dollars. They tell you, "If you don't have it, go buy it NOW." What's the problem? Well, screen-capture software is usually quite pricey! (They go as high as $300 for a single license). There are many people buying it at that price (hey, this software works like crazy!), but what they don't know is..... You don't need to pay that much! ($300? No way)
