List Conversion Tactic - \$5,000 Per Month From A Tiny List [Rights: Master Resale Rights] Is It Really Possible To Earn \$5000 Permonth From A Tiny List? Well, Someone Is Doing That(And More), And Is Now Sharing His Secret ----- "Download Free Preview" To View Full Sales Page ----- Dear Future Email Marketing Rockstar, "The money is in the list" - Right? Yeah... I guess so - but if you aren't actively trying and testing new email marketing techniques - you're losing thousands of dollars every week (or day, depending on the size of your list)... What I want to share with you right now is a trick I picked up from one of the best copywriter's I've ever met (Hes written copy behind the scenes on 6 Guru-level launches in the last year, selling anywhere from \$500,000 to \$5,000,000 and those are just the ones he can talk about!) So, here's the facts... What is this? This is a no-fluff report (3 pages) that discusses one of my favorite methods for churning more sales with my list. Why should you listen to me? My list is small - only 3,868 as of this writing - but I routinely generate \$7k+ per month with my tiny list. If you've got even 1,000 subs on your list - can you imagine how much money you could be making if you just had the right tools? The thing is, most list owners aren't using nearly 1/2 of the potential their list has. With this single technique, you'll see how easy it is to create riveting follow-ups and strong single mailers that convert browsers into buyers - again and again. How long will this take to start working? You can have this working 5 minutes after reading this report... That's what's so cool about this. Since this works with both single mailers and follow-ups (You can and SHOULD build your entire follow-up sequence based on this one little technique...) you can send an email out using this method and start making money right now.
