The extension .diz is used to enable you to put the whole product instantly in a blog tool. This way you do not need to worry, that these lists/descriptions (a.k.a. not-debt Consolidation-content) get published on your site. The blogging tool should only process .txt-files. Hence .txt is used exclusively for publishable debt Consolidation content, but not for internal information. It is just used to make your life easier. P.P.S.
