Dear Sufferer! My name is Deena Fine. Not only am I a health researcher but I also happen to be a woman who suffered needlessly and pointlessly from smelly annoying chronic yeast infections for years. Nobody could help me. It seemed the more antibiotics that I was prescribed the worst the yeast infections got! I went through several pairs of underwear a day and then just gave up wearing any at all. I stopped having sex because it became too painful. I spent a kings ransom on vaginal sprays, creams and all kinds of remedies to deal with the vaginal discharge and fishy smell. Worst of all I lost my complete faith in the medical system. It was like they saw my discomfort as being "just something I had to live with". Dealing constantly with doctors who were looking at me like there was something wrong with MY body because it would not respond to THEIR drugs really hurt my self-esteem. Every day I was waking up and hating myself because every day was the same. I always had the itch and was sneaking away to the washroom at work to deal with it. I also always felt unclean and no amount of showering could make me feel fresh again. I know you are frustrated, exasperated and at the absolute end of your rope when it comes to dealing with your yeast infections or you would not be reading this page right now. You need to know that I have been there - I have suffered terribly from these yeast infections and I have experienced the chronic misery of all of the symptoms first hand. The good news is that I have found the cure! Thats right. I can help you get rid of the yeast infection that you have right this minute within 24 hours. I can also help prevent you from ever getting a yeast infection every again. Isnt that great news? There is a cure for yeast infections that is not only IMMEDIATE but it is also PERMANENT. How many times have you sat with a doctor and been prescribed round after round after antibiotics only to find relief for a day or two? Imagine getting away from this vicious cycle of taking antibiotics and experiencing a maddening reoccurrence of the itchiness and foul odor for good. Imagine not having the doctors look at you like you do not know how to take care of yourself. If you suffer from chronic yeast infections it is definitely worth a minute or two of your time to learn how to cure them now and forever by taking in by what I have to tell you below. First of all you need to know that the advice you get on the internet after typing in a search such as "home remedy - yeast infection" is not always the right advice. I typed these keywords "home

remedy - yeast infection" into Google and the very first thing that popped up was one of the most dangerous cures for this condition that exists - using BORIC ACID. Boric acid is a poison that does not belong in your home. Yet you can find home remedies that advise inserting this in your vagina. Yet another cure I kept seeing was to go on these intolerably long fasts that involved drinking only water and lemon or certain types of juices. As someone who is a little bit familiar with the way the human body works I cannot begin to tell you how unhealthy these food deprivation diets are. The principle behind starving yourself every day is to try and not feed the yeast cells in your body but the problem is that you end up starving YOU as well. Some of these "yeast elimination" diets have calorie intake rates on them that are so low that NO human being could stick to them for more than a day or two. By now you can probably tell that I am speaking from very hard won experience. Of course as I was once a chronic sufferer of these terrible infections you can imagine that I was all over the internet always looking for an alternative to the antibiotics that were causing me to be trapped in a treadmill of antibiotic use and recurrent pain. In fact, you could say I was just like you. I know that doing things like inserting boric acid in your vagina or starving yourself and surviving on only liquids to "rinse" yeast out of your body is very bad for you. However I could not help but think of all of those women out there who do not know this was bad for you and how much they must be suffering as a result. That is why I decided to write this book. I found relief easily and simply. I could not bear the thought that there were tens of thousands of women (and also some men) out there who were poisoning themselves and starving themselves and making their recurrent yeast infections even worse simply by taking the wrong advice. And who could blame you for trying to find a safe and effective all natural way to treat these infections? Do you know what the definition of stupidity is? Doing the same thing again and again and expecting a different result! Given that definition I found myself wondering again and again why I kept going to the doctor, kept getting antibiotics and kept getting another yeast infection and expecting a different result. Every single time I was given an antibiotic, there was never a different result! There was ALWAYS a rebound infection! Yet I kept going back to the doctor and getting more antibiotics with both the doctor and I seemingly to be under the same irrational delusion that "this time it would work" when plainly the antibiotics had been no solution to my problem the 23 times I had taken them before. Quite frankly it was stupid. The fact that doctors seemed so exasperated with me and also the fact that everything on the internet seemed to be an "iffy" in terms of being a safe cure got me into the business of researching how I could best help myself. So I made it my

goal to accomplish one goal - The cure for all yeast infections without drugs DO YOU NEED MY HELP? ASK YOURSELF THE FOLLOWING - Are you sick every day? Do you feel slimy and unclean? Do you smell? Do antibiotics only cure you of your problem for two or three days? Do you wonder if you have been correctly diagnosed? Do you want to get rid of the burning? Do you want to get rid of the itching? Do you want to get rid of the painful urination? Do you want to get rid of the vaginal discharge? Do you have skin rashes? Do you have bad breath! Are you constipated? Are you always fatigued? Are you craving strange foods? Do you eat and eat and still feel hungry anyway? And finally DO YOU HAVE CHRONIC YEAST INFECTIONS? If so - I can help you! Every single symptom above is associated with having a yeast infection. In my book "How To Defeat Yeast Infections Forever" I put an end to your misery - once and for all. You will get relief! You will regain your health. You will stop feeling bad because of the way the yeast is affecting your physically - no more bad breath or stinking body secretions. You deserve to live a life FREE of yeast infections and the anxiety, comfort and sexual problems that they cause. Typical Yeast infection Symptoms Menstrual Pain Bladder Infections Skin Sores Asthma Shortness of Breath Food Allergies Memory problems Learning problems Swollen joints Hand pain Knee pain Hip Pain Flatulence (farting a lot) PMS Feeling run down Low Blood Sugar Poor memory Irritability Headaches Acne Sexual dysfunction Painful intercourse Vaginal Odor Premature Aging The Changing Face of Yeast Infections There is another problem when it comes to yeast infections. The symptoms truly vary from person to person. For instance, there are a lot of people walking around out there thinking they have a bladder infection when what they really have is a yeast infection. These symptoms can vary from individual to individual and to make things even trickier they can also vary from day to day. It is also a mass problem. About three quarters of the population have yeast infections at one point in their life or another. They are given medications to treat the symptoms but the root cause of the infection is never treated. This is what I found out-- To treat a yeast infection you need to wipe out the root cause or it will come back! We just never seem to do this! Only a very few people seemed to know how to treat the root cause of these yeast infections until now. Is Your Yeast Infection Chronic? If you don't treat the root cause of a yeast infection you are always going to have it! Medication is just like a pacifier that only treats the problem for a short while. Yeast tends to rebound and be twice as worse after each antibiotic round. These flare ups can be continual and go on for years. This is because the drugs don't work for long. The yeast cells sit there and wait until the conditions in your body are just right for generating another flare up. Some people don't even

know that they have a problem with yeast infections. Some people become so accustomed to the discharge and smell that they just think it is part of aging. The tragedy here is that they do not have to put up with itchiness, slimy feeling, odors and everything else that comes with yeast infections. I Have the Cure! The cure is simple. You see there are several types of yeast cells in your body and all of them have the potential to start multiplying out of control. Get rid of the yeast called candida and the infection is gone forever. I spent almost a full year researching everything that I could on this topic and came up with the best remedy possible for getting rid of candida. The process I recommend is safe and costs very little. It is fast, permanent and completely safe and natural. In fact, you can find everything that you need to heal the problem using my methods in your local grocery store. Of course at this point you are probably asking yourself -- If the cure is so simple and affordable and right under our noses why does my doctor not KNOW about it? There is a simple answer to this question. Doctors work with the big pharmaceutical companies. Pharmaceutical companies cannot make money off of you if you are well. Doctors cannot make money off of you if you are well. Every time you use a natural cure, you cost a pharmaceutical company a sale! This is because your doctor does not have the opportunity to prescribe you an antibiotic drug. The medical industry must make money. They are not in the business of instantaneous cures. Both doctors and pharmaceutical companies are in the business of writing prescriptions. That is how they make money. **Drugs DONT Get Rid of Yeast!** When it comes to getting rid of yeast infections forever prescription drugs do not work. They might work for a day or two at eliminating your symptoms but then you have to buy more drugs! Drugs are pushed on us every day. The promise is that we will get better as long as we keep on using them. The problem is that these drugs do not heal you. If anything they cause the candida yeast to multiply in your body. If anything these antibiotics feed this yeast in the long run by creating acidic conditions in your body. Taking a prescription drug for a yeast infection is just like putting a band aid on a wound for open heart surgery. This treats the symptoms only. To get rid of the yeast, you need something that eliminates yeast! Not just the infection caused by the yeast! There are many comparable medical conditions that are also treated by drugs that hook the patients on them for years on end. A great example is Xanax. It is used to treat anxiety but it does not treat the underlying cause of the anxiety. Once the thought that triggers the anxiety is removed through a non drug treatment like psychotherapy, which is natural and safe compared to taking brain altering chemicals, the person is usually okay. Yet another example is insulin. Insulin is not the cure for diabetes. It treats the symptoms of

diabetes but not the real cause which is high blood sugar. The same thing happens with antibiotics. They are simply impossible to cure. Drugs Make It WORSE! In fact in the case of yeast infections the prescription drugs compound the problem. After a while the yeast becomes resistant to antibiotics and the infection comes back with a year! It rages back in your body even worse than ever before with even more discomfort and pain than you ever thought possible. Who in their right mind keeps taking a drug that makes us sicker! WE ALL DO! This is not a sensible plan when it comes to maintaining your health. In fact, treating your body this way comes under the category of self-abuse! The Truth about Yeast Infections The fact we those infections have been around since we have been. Yeast has always been a curse, even before the drug companies came into existence. In the past people managed to cure themselves of these infections without pharmaceutical drugs. Nobody lived their entire life experiencing one chronic yeast infection after another like they do today. They managed to cure themselves and become well! My mission as a writer, researcher and bonafide sufferer from this disease was to find out how these people managed to actually cure themselves and get over the yeast infections. Furthermore I wanted the cure to be natural, safe and effective so that the root cause could be eliminated. I DID find the cure. I DID cure myself. And I can cure you. My process for curing these ailments is dialed thoroughly in my book which you can download, today, here on this page. It is called -- Curing Yeast Infections The Natural Way Dont think that is a title with a vain promise. I really did discover how to get rid of them forever. How I Won the Battle With Yeast Although my book is written by a professional researcher (myself) keep in mind that is also written by a genuine and sincere human being who has suffered for years from these infections. I had real trouble with recurrent infections for many years. I have been there. Perhaps you can relate to the fact that I started avoiding sex. Sexual intercourse was frightening. There was itching, burning and I would feel like I had to urinate even if I didnt. Then I had a fear of disgusting my partner with the smell and appearance of the vaginal discharge. The smell was often fishy and very unpleasant. There was also the pain, before during and after sexual relations with my husband. I soon began to avoid sex. My partner started to think it was him. It wasnt. It was simply that I was ashamed of how slimy, smelly and unattractive I felt. After suffering from yeast infections for two and half years I finally hit rock bottom. I had been in the vicious cycle of getting them treated with antibiotics and then I finally got an infection where the symptoms could not be allayed at all! I was prescribed several rounds of antibiotics and NO type of antibiotic worked when it came to getting rid of the pain. This was a serious

yeast infection that was compounding in my other organs and I was well on my way to developing Pelvic Inflammatory Disease. You see the yeast had hung around long enough in my body that it had time to change into a mold that latches on to your intestinal organs and compounds and gets worse and worse. This was so messy, painful and annoying and downright frightening I found myself spinning into a panic! What if I had to live the rest of my life this way? What if I was doomed to have this itching, smell and pain every day for the rest of my life and there was no cure. This really spurred me on to use all of my skills and faculties and resources to find out absolutely every single thing that I could about yeast and how the overpopulation of candida yeast in the body eventually could lead to debilitating daily infections! After about a year of spending a lot of time in the library, reading a lot of books and journals and talking to experts about candida, thrush and rashes and then trying out each and every cure suggested I finally found one that works. And when I did find the cure the results were absolutely amazing! I knew it was the one because All of my symptoms were GONE within 24 hours! My infection was gone and it never ever came back! I no longer smelled, not from my breath or from any other part of me.. I slept better! I got my energy back! I FELT LIKE MY OLD SELF AGAIN!

Yeast Infections Facts Yeast Infections Affect Everyone. A yeast infection is just not a "female disease." Men get them too! Yeast Infections Affect All Ages!
