Regards, Thomas Salvador. P.S. How to use the .diz files? The .diz files are just regular text files, you can open in your favorite text editor. The extension .diz is used to enable you to put the whole product directly in a blog tool. This way you do not need to fear, that these lists/descriptions (=not-diabetes-content) are published on your site. The blogging tool should only process .txt-files. Therefore .txt is used exclusively for publishable diabetes content, but not for internal information. It is just used to make your life easier. P.P.S. Visit salvador.tradebitfor other high quality products. Visit plr.li for other high quality products with private label rights. Get 25 diabetes PLR articles, #5 now! Tags: diabetes cash
