"Does Your Backup System Protect Your Online Web Business Every Day -- And Every Night? (Even When You're Sleeping?)" Amazingly Simple Automated Software Can Virtually Guarantee You Never Lose Your Databases And The Vital Information It Contains! Back It Up Daily, Weekly, Monthly and Even Email It To Yourself Automatically! It Will Even Back Up Your Data to THREE DIFFERENT LOCATIONS! Automatically! From the Desk of: Tom Montelione Before you learn more about this backup system, let me tell you a little story... I was going through and cleaning my mailing list in an autoresponder script installed on my website when . . . BAM! GONE!!! Disappeared! Vanished! The database that stored all of my subscriber information became corrupt, destroyed my list and damn near destroyed my business! I called my web host in a panic and sure enough - the database server took a nose dive. And sure enough, NO! They could NOT recover my data! This is a common enough tale. Could have even happened to you. If it did, were you backed up? \*\*\*\*\* Before you read another line, you need to take a look at this incredible video. You will see how effective Database Backup Generator is when I destroy my list . . . on purpose! That's right! What once threw me into a state of panic, I will do on purpose. Right before your eyes. Just to prove a point! Come see how crazy I am . . . Start Demonstration \*\*\*\*\* I know what you're thinking. You're not worried because your web host backs up your database, right? They All do. Is It Important For You To Know Your Business Is Backed Up? It is becoming commonplace now. More and more web hosts are NO LONGER BACKING UP their customers sites or databases. All those resources are expensive. They will most likely tell you to back up your own site. I know because my OWN web host once sent me an email advising me to back up my own data because they no longer do that. Or maybe they do back your website up... for an EXPENSIVE recovery fee or maybe they only do it once a month! Sorry bub, but in my business I can't lose a month's work or I'm out of business! Even though most web hosting control panels offer manual backups...we have yet to find one that offers the MOST important feature ... AUTOMATIC Backups! That's what prompted me to develop Database Backup Generator. The whole

idea behind my script is... SET IT, FORGET IT and RELY ON IT! Database Backup Generator will automatically backup your databases for you and... you don't even need to lift a finger! [Click Here To Order](#) Check out how this totally awesome, totally automatic software will protect you: Database For: What It Can Cost You with No Protection: Protected With Database Backup Generator: Newsletter (Your Opt-In List) Your subscribers and their loyalty Your advertisers.
