If you are anything like I was when I first started attempting to make money online, you're probably ready to pull your hair out. While there is no doubt a ton of information available that can tell you what you need to do, attempting to sort through it all without getting information overload is next to impossible. What you are about to read is a step by step process that will allow you to take the guess work out of the equation. By no means is this the only way to make money on the internet. There are thousands of different paths you can choose. Some require more work than others and some cost more money than others. The way I am about to show you is one that will not cost you a dime of your own money if you do not want it to. These methods can be followed by using strictly free resources. You of course can speed up the process by spending a little bit of your own money, but it is by no means necessary. This is the exact method I followed to make over 115 sales in the last 30 days at the time of this writing, netting me over \$2227.00. There is no rocket science to this method. All it takes is willingness to do a little work and you will make money. This step by step process that I'm about to show you was designed to take you about 2 -3 hours per day. I have a day job as well and that was about all the time I could afford to spend. At first it may take you a little longer, but as you get comfortable doing the steps you will find your speed will increase. If you cannot get through the steps each day, do not get upset and quit because you are behind! Just keep at it and do as much as you can. Pick up where you left off the next day if you get a little behind. JUST KEEP WORKING and you will get results. Every day there will be a list of tasks to do for the day. Follow the list and you will do fine. Each day there is a done line for you to check off your tasks as you finish them. This way it will be very easy to keep track of what you did for the day. Just print the pages out and put them in a binder for easy, well-organized, access.
