successful web site has in place. What is this book basically? Super Affiliate Handbook by Rosalind Gardner is, as the title also says, a handbook for affiliate marketers. The word, super in the title, doesn't imply that the book is only meant for super affiliates. Rather, in Super Affiliate Handbook Rosalind Gardner intends to show you how you can become a super affiliate. Rosalind Gardner knows what she's talking about. On her web site, she delivers the proof that she personally earned \$436,797 the year prior to the publication of Super Affiliate Handbook. Rosalind Gardner has primarily earned this income been earned by marketing affiliate products and services targeting the dating market. But can you do the same, even if you want to target other markets? The experience of several super affiliates confirms the fact that it can be done. And in Super Affiliate Handbook Rosalind Gardner shows you step-by-step how she and several other affiliate marketers have become so successful. What I like in this book Super Affiliate Handbook by Rosalind Gardner is one of the very best overviews I've ever seen over the process of marketing affiliate products. In fact, the only competitor I can think of right now is James Martell's book on the same subject. In opposition to most other books on affiliate marketing, and Internet Marketing in general, in Super Affiliate Handbook Rosalind Gardner really goes into the details on how you can build your own profitable Internet business. Rosalind Gardner covers several subjects that most other authors either skip or just mention in passing. For instance, one of the most important and helpful parts of Super Affiliate Handbook is the section on how to track your results. Most other Internet marketers underscore the importance of doing this, but they don't tell you how. Rosalind Gardner doesn't emphasize the importance of doing this, she also tells you how she does it. And she shows you the spreadsheets she herself uses to track her number of visitors, buyers etc. This is a very valuable part of this book. It's just a shame that you don't get the spreadsheet templates themselves, so that you can use them in your business. You just get a screen view over the templates. Now, it isn't that difficult to create these templates yourself. If you have Microsoft Excel (or another similar program) installed on your computer, you can easily create these templates yourself. But it would have been easier if you got them together with the book. Rosalind Gardner also leads you through the formula for calculating your conversion rate. This formula is of course well known, but it's really fine that she has included it in the book. If you want to track your ad results this formula is indispensable. As I mentioned above, one of the things I like the most about Super Affiliate Handbook is the degree to which Rosalind Gardner gives you all the details of how to become a super affiliate. She covers How to decide whether you have what it takes to start your own

Internet business The importance of making a plan for your business Rosalind Gardners own software recommendations How to filter away bad products and find the kind of products thatll earn you a nice income as an affiliate How to market the affiliate products Etc., etc. Super Affiliate Handbook pdf

download contains so much valuable information that Im really impressed. But despite the amount of information, you get enough details to get a grasp of each step in the process. And you never loose the overview. ##### Just Click the
