Why Not Build Your Own Targeted List? Learn how to build 1000 List Members In Less Than One Month! These strategies for creating a mailing list of targeted buyers that will return to your site again and again can earn you thousands and thousands of dollars. **START YOUR BUSINESS BUT BUILD IT AT THE SAME TIME! BE THE FIRST PERSON ON YOUR STREET TO BE RECESSION PROOF AS YOUR LOYAL CONSUMERS RETURN TO YOUR WEBSITE AGAIN AND AGAIN.** Dear fellow internet marketer - Let me guess! You are HERE reading this web page because you have figured out that the most important thing that you can ever do when building an online business is to create e-mail lists that bring you buyers, not window surfers! Let me tell you about my first experiences as an internet marketer and the things that I did that were such a mistake when to trying to lure targeted visitors to my site. One of the most naive yet optimistic things I did was to go to one of those online joints and try to buy 10,000 email addresses for ten dollars. When that didn't work, I then tried to buy 50,000 emails addresses for seventy bucks - and then onwards and upwards until... I was spending 200 bucks a week or more on thousands and thousands of email addresses! And did I make my investment back in this type of advertising? NO! In fact, I only made about 1 in sales, and sometimes I would buy entire batches of opt-in mailing list addresses only to find out when I checked my website stats that... I had not made one single sale! So why didn't this approach to internet marketing work? Well, it seems that even though I was attracting thousands and thousands of visitors to my site, none of them were exactly interested in what I had to sell - they were just random email addresses. The result was a bona-fide internet marketing disaster. At first, I was just thrilled to see the counter on my site start reeling upwards into hundreds and then thousands of visitors - but I was not making any sales! Then, to add insult to injury, my website host decided that so many people visiting my site were a big burden and began to CHARGE me for the extra bandwidth space that all of these visitors were taking up. Many very experienced online marketers have learned that lesson the hard way. Many of us have also had it happen when we are buying targeted email lists. You have probably seen these lists for sale online as well. Instead of selling you bulk email volume and hoping for a hit and miss approach, you get a list of people who are supposedly interested specifically in what you

have to sell. OH! When I first saw these lists online I thought that they were the answer to my prayers. I was so wrong. Little did I know that I was spending about a hundred bucks a week on STALE addresses. These email addresses were a little better than the untargeted ones and my sales were slightly higher, but for the most part the problems with these lists were simply that they were bought from successful websites that already had already converted most of the names attached to them into devoted, loyal customers! That meant that even though I was emailing them with my offers, I was not likely to get any of the people attached to these email addresses as customers unless my deal was especially good or unless the person was extremely disappointed with their current provider. Many of these addresses would also bounce back. Who knows how old some of them were! Paying thousands and only making hundreds is no way to live when it comes to internet marketing, and that resulted in my book, One Month to 1000 List Members. Ask any experienced marketer and they will tell you that the most important thing that you can ever do when you are building ANY kind of online business is to CREATE EMAIL MAILING LISTS. That is why I wrote an entire book dedicated to the topic. After my own miserable failures when it came to trying to put together a lucrative email opt-in list for my own customers, I realized that there had to be better ways to put these lists together. The mailing list is essential! It is an absolute must-have item if you are going to BUILD YOUR BUSINESS at the same time. No matter what kind of online business you are running, it is important to comprehend that there is a vast difference between making money online and building your business. And in order for a mailing list to work for you it must be completely focused. For example, many people who decide that they want to earn an income from the internet don't really have a business plan. They are fly by night affiliate marketers or online businesses that try to make money online by featuring paid advertising on a webpage. Both types of internet marketing result in the marketer concerned making money, but as they do so they are not necessarily being attentive to the idea of building their business at the same time. At the very heart of the business building concept is the ability to collect information from internet users who can take a specific action to give you permission to send them additional information in the future. In this case the specific action that you must ask of each and EVERY single visitor to your site is to subscribe to your emailing list. In fact - Nobody who visits your site GETS OUT ALIVE until they have given you that email address so you can send them the targeted information that they need so they know to come back and BUY from you again. This is like asking somebody to make a commitment in the worst way, which is to spend money with you. In my eBook 1 Month to 1000

Members, I outline several reasons why it is so important for you to build this commitment of the email address between you and the customer. You will learn - * Why the customer feels committed to you after giving you their email address. * How this is an indication that they are willing to spend money on the internet. * How you can use their initial purchase to give you an indication of how much money they are willing to spend. * How having this kind of list can save hours chasing down new prospects every day. Are you ready to have your customers commit to buying from you again and again and again?
