Our cloaking software now supports international languages German, French, Spanish, Dutch, and Italian! Furthermore, flash redirection is enabled, updated new templates (4) total, and many major enhancements. Download the Free Demo Now! Phantom Cloaker is intelligent and creates optimized Pages which appear to have been hand made and contain genuine content. Phantom Cloaker is unlike other content generation tools which simply dump all your keywords in one place and risk being recognized as spam by search engines. Phantom Cloaker can include custom text or html that you want to appear on all the highly optimized pages. For instance, you can use this to insert a copyright message, banner ad, or a hit tracking script in every optimized page. You can also link to others sites you own to influence their page rank. Phantom Cloaker can hide the fully optimized content from your visitors and show them your website or any url you specify. Advance Cloaking techniques insure your pages are indexed and are not exposed to others snooping around at your source codes. Phantom Cloaker provides several html cleaning and formatting options which insure standards compliant and search engine friendly optimized html pages. Unlike other products you do not need to purchase \$200.00 worth of add-ons to get your desired results quickly. Phantom Cloaker uses several optimized templates to generate static pages. New and more optimized templates will be periodically available on this page which you can download and import into Phantom Cloaker. (Note: Do not use with adsense) Tags: seo
