The Clandestine Chemist's Notebook NOTICE: TO ALL CONCERNED Certain text files and messages contained on this site deal with activities and devices which would be in violation of various Federal, State, and local laws if actually carried out or constructed. The webmasters of this site do not advocate the breaking of any law. Our text files and message bases are for informational purposes only. We recommend that you contact your local law enforcement officials before undertaking any project based upon any information obtained from this or any other web site. We do not guarantee that any of the information contained on this system is correct, workable, or factual. We are not responsible for, nor do we assume any liability for, damages resulting from the use of any information on this site.

Introduction
Welcome to the very first version of The Clandestine Chemist's Notebook. Originally I had the idea of making this information into a website. But after reading articles about certain people being arrested for information they had posted on their websites (in America by the way), I decided a text file would be better suited for information such as what you are about to read. My main reason for choosing to put this information in a text file is because I am pretty much allowed to say whatever I want. A website draws too much unwanted attention from very unrespectable American Bureaus. Let me cut to the chase. Basically, this is a handbook that will explain to you exactly how to manufacture illegal drugs. I must state here that this manual is not a ripoff of "The Anarchist Cookbook." The methods explained within this text file are proven syntheses for manufacturing illegal drugs. You will not find any "Make speed from Vicks Nasal Inhalers", or "Make real LSD from Morning Glory Seeds" in this text file. If you are under the age of 18, I highly suggest that you not read any further. I suggest that you get rid of this file, and act like you never saw it. There is a simple reason why: If you are under 18, and your parents find this "Drug Lab Notebook" hiding under your bed, you will be in serious trouble for sure. Also, you just add to the anti-drug war. Every time a parent finds this sort of information under a minor's bed, something happens. Which is always one point against people such as myself. This manual may shock you. You will discover exactly how simple it is to make drugs in your own kitchen. There are some things that I have not added to this text file, like how to make LSD for example. I did not put any LSD Synthesis in this manual because the

manufacture of LSD normally requires a Laboratory that has had a few thousand dollars dumped into it. LSD is not a very practical drug for a normal Joe like yourself to manufacture, since it requires college level chemistry schooling. I have added to this text file as many drugs as I thought you might enjoy. You will also find a few sections in here that are focused towards extractions, and Growing. I am not putting anything in this text file that tell you how to grow Marijuana, just how to extract the good stuff. However, I am putting in an area on growing Mushrooms. Mainly though, this text file is focused towards manufacturing, not growing. I must stress to you that you do not carry out the information contained within this text file. As with most 'Underground' text files, this is for informational, and entertainment purposes only. It is somewhat funny, but I have never manufactured an illegal drug. However, chemistry is a subject of mine that I love, I also do Drugs. Since these two mental states are combined (Love of Chemistry, and Love of Drugs), I tend to research drug manufacture alot. Just remember that if you were to actually carry out any of the information contained in this text file, that it is quite possible you will be busted by the Government, and thrown in Prison for and estimated 10 years for Manufacturing a Controlled Substance. Not a very fun situation at all, I'm sure. You should be expecting a few other text file's coming out sometime soon related to similar subjects. So keep an eye out, and drop me an E-Mail if you have ANY suggestions. Any information you have, I will probably find a use for. I will include whatever decent information you have in any text file I produce. You may distribute this document freely to whomever you would like to. Under a few conditions of course. #1 You will not omit my name from this file. #2 You will not edit any of the text. However, if you decide to copy this file onto a webpage, and compile it into an HTML, you may delete the ASCII art for convenience. You may also print this file out onto Paper, and distribute it among your friends. In all fairness, make them pay you \$2 for the paper. So, enjoy your reading. This is an education process. Knowledge that you 'should not be permitted to know.' You're now fighting the system by gaining this knowledge. The system doesn't want you to have this information floating around in your brain, because it gives you power. Keep up the good fight. CONTENTS
