"Learn How You Can Turn \$8.00 Into \$80, \$800 Or Even \$8,000.00 Instantly!" Dear Domainer, If you have ever wanted to start an online business but were unable to come up with the thousands of dollars in start-up costs, you will love what I am about to share with you. As someone who started working online a few years ago now, I had tried everything under the sun in order to be given the chance to quit my day job and pursue my dream of working from home. From work at home jobs, to business investment opportunities (and even dabbling in the forex marketplace), I spread myself and my money around, hoping that I would stumble across something.. anything, that would work for me. To be completely honest - I failed miserably.. The business investments went belly up as I was not experienced to understand the dynamics of running a business online and after forking over my hard earned money, time and time again, I decided that it was just too risky, too expensive and too confusing. But then one day, someone opened my eyes to a whole new way of generating income online that cost me nothing more than \$8.00 (\$7.95 to be exact). Enter the world of domain flipping.. If you are unfamiliar with what domain flipping is all about, let me explain it real quickly for you. The idea behind domain flipping is to purchase low cost domains and then sell them at a higher price. It's that simple. As I began to explore the industry I realized that generating a steady income from buying and selling domains was easier than ANYTHING else I had ever tried.. For Example: Low Cost Start Up You can get started for less than ten bucks. How many other online businesses can offer you such a cheap start up cost? This completely eliminates ANY risk of losing your shirt and best of all, you can figure out whether domaining is something you are interested in and can profit from in just a matter of days.. No Difficult Learning Curve This was an important one for me. After spending weeks studying dozens of methods in the past, to which I believed would generate results I always ended up right back at square one. Not only had I spent hours and hours for nothing, but I was constantly distracting myself which caused me to lose out on many real To be quite honest, there was little else that was ever this easy to learn, and affordable to to get involved in.. I figured, what did I really have to lose? It Was The Best \$7.95 I Ever Spent.. Up until the time I got involved in domain flipping I estimated that I had spent over \$18,000.00 online from 2002 until 2008. I had purchased

websites on eBay that didn't pan out, hired coders to create scripts that I couldn't sell, and even purchased turnkey businesses for \$1,600 a pop that were heavily saturated and worthless.. Yet on one sunny day in September, I turned \$7.95 into \$275.00 in less than 18 minutes.. I was blown away.. Imagine, having spent years trying to figure out how to make money online and in less than 18 minutes I managed to take a measly \$7.95 investment and turn it into \$275.00.. I couldn't believe it.. I sat there dumfounded, and after the initial shock wore off I actually was quite upset. Why the heck did it take me so many years to figure out how to make money AND worse.. this was so much easier, cheaper and faster than any of the expensive, complicated and confusing methods I had tried in the past! I was both angry and excited.. I knew I was onto something and so I began to slowly purchase domain names, flipping them on a daily basis. In my spare time, I purchased a few guides on profitable domain flipping so I could increase my knowledge and beef up the amount I was earning from each domain. I also spent months analyzing the 'top dogs', these are the guys that can take a \$10 domain name and flip it into a \$1,000.00 sale in a matter of a few days.. Investigating their methods, dissecting their auctions and snooping around wherever I could manage to get into ended up boosting up my own efforts in a matter of weeks. This Is One Of Hottest Industry's Online With NO End In Sight.. With the Internet, as you know, things change from one day to the next. In fact, what's hot today might end up dead in the water tomorrow.. trends change, people change, business changes. One thing however, is never ever going to change for as long as the Internet exists: People NEED and WANT domain names! You know for yourself that as the years go by, more and more people are finding their way onto the Internet and as they do, the domain industry continues to grow.. in fact, it's bursting at the seams with buyers eager to purchase domain names that mean something to them.. these domains can be generic, every-day domains that really hold no value other than what the potential buyer sees in it. As they say, beauty is in the eye of the beholder, right? Well, the value of a domain name is determined by your prospects. This means that something you paid only \$8.00 for could end up being worth \$80, \$800, or even \$8,000.00!
