Regards, Thomas Salvador. P.S. What is this .diz thing? .diz files are just regular text files, you can open in your favorite text editor. The extension .diz is used that you can put the whole product AS-IS in a blog tool. This way you do not need to fear, that these lists/descriptions (=not-seo-content) get published on your site. The blogging tool should only process .txt-files. Therefore .txt is used only for publishable seo content, but not for internal information. It is just used to make your life easier. P.P.S.
