

Php - Link Tracking Business Script

[DOWNLOAD HERE](#)

This script is simply awesome! It is a new PHP script, and will allow you to set up your own link tracking business! There are two different memberships you can sell with this script, and both are beneficial to you! The lite membership costs less, but requires your customers to keep a banner to your website on theirs in order to track their stats! The pro membership of course costs more (Whatever price you set!) and does not require the customer to link to your site! The script automatically takes payments via the PayPal subscription method so you are insured to receive your fees every month! It also keeps track of your customers statistics daily, weekly, and monthly! This is a VERY nice script!
