----- From: [Insert Your Name Here] Date:
Sunday, March 23, 2008 Dear Clueless Mailing List Owner, It is every mailing list owner's wish to continuously build their mailing list consistently in pursuit of making money online. It makes sense, anyway, since the practice of publishing for profits dates way back into the early days of conventional businesses and the Industrial Age. The advantage we have today in the Information Age, though, is that we are able to publish our own eZine (or newsletter) "paperlessly" without incurring high publishing costs and well... save plenty of trees in the process. With every savvy marketer often quoting that "the money is in the list", it becomes all too clear as the money-making success formula for every eZine publisher and mailing list owner can be summed up as: Subscriber = Prospect = Potential Customer And the more responsive subscribers you have, the more money you can make with every offer you send to your mailing list. If It Is So Easy, Why Is It So Hard? Yes, you read that right. If it the success formula is so simple, then why are many mailing list owners struggling to make money from their list? Now, I thought you should know something really interesting: the problem most eZine publishers and mailing list owners are having have little or nothing to do with starting their online eZine publication. But rather, the major problem lies in list building. And this is often true with most clueless mailing list owners. It's granted that any Tom, Dick and Harry can easily start his own eZine publication. And like I've said earlier -- we can all publish our own paperless eZines without incurring high costs and cutting several trees. But not everyone can build their own mailing list easily and effectively. And the result? Some clueless eZine publishers lost a small fortune to ineffective advertising in pursuit of building their list while others are afraid of risking the little money they have, causing the size of their mailing list to remain meager. Are you one of them? Sure,

you can resort to marketing methods such as article writing and Traffic Exchange, but how many subscribers can these methods fetch you? Not many, in the long run, compared to what I am about to tell you later. Alternatively, you can buy subscribers from list brokers but if you are on a twine-breaking budget, this option may not be for you, either. Okay, I won't go on venturing into solutions that seem less possible to you and your needs for that matter. But we've established that you want to build your mailing list intensively, right? Right?? And perhaps deep within, the challenge you want to pose to yourself - or anyone for that matter - is: Challenge: How To Get 1,000 to 3,000 Subscribers For FREE In 7 to 21 Days How do YOU - or any "somebody" or "nobody" - get 1,000 to 3,000 subscribers without spending a single cent on buying them over in the space of 7 to 21 days, even if you have a small or next-to-nothing mailing list? It might seem like Mission Impossible to a budding eZine publisher, but I have a line of good news queued up for you: A lot of eZine publishers have already accomplished this. When they started building their list using the method I am about to announce to you soon, they had very little resources, subscribers or even "reputation" for that matter. It doesn't take a rocket scientist to be able to pull such a feat. In fact, you don't need to be well-versed with programming! And you can do it, too! Having said that...

And for the first time ever, I will show you how you can start your own Mini Give Away event, minus the stress and useless work load. Now at this point, I admit that you probably won't get as good a result as most big time Give Away event runners. However, if you can get at least 1,000 subscribers (or more) through running your own Mini Give Away event successfully, then this manual has done its job. Ultimately, the purpose of my manual is to be able to show you how you can build your own mailing list the quick and easy way, something that most people often overlook owing to its simplicity. Many individuals and small time marketers did very well with this method that has enabled them to rival even the giants of Internet Marketing when it comes to list building. So can you, too! As long as you have a strong desire to build your mailing list the smart, quick and easy way, look no further because my manual is what you are looking for. So, How Much Is This Manual Worth To You? Consider the following: If you buy subscribers for say, 10 cents a name, then 1,000 subscribers mean \$100.00 to you. And if 1,000 subscribers mean 20 customers to you (at 2 conversion rate) for a product you sell at \$97.00, then 1,000 subscribers mean \$1,940.00 to you. On the same token, since this manual can show you how to get at least 1,000 subscribers for FREE, then this manual is worth \$1,940.00 to you. Let's not forget that practicing the information within this manual also means that you save at least \$100.00 from buying subscribers. Yes, the power of the information within this manual, if practiced, is worth that much. But since the manual doesn't come with hand-by-the-hand coaching, videos, audio, and the such, I can let you have a copy of this manual at a deep discount of only \$37.00. Read that right -- that's only \$37.00! It's so affordable you cannot afford not to afford it -- or you can chuck your dreams of building your list at warp-speed for FREE behind. If you ask me, I think that struggling with building your mailing list the old fashion way is much more costly than investing in my manual. I haven't taken into account the amount of potential revenue and the time you could be wasting, either. Which one is more expensive? Investing \$37.00 in getting the quick and easy "know how" on building your mailing list? Or save \$37.00 and struggle to build your meager list and waste even more time, effort... and even more money? The choice is clear.
