Everything you need to know about lowering cholesterol can be found amidst these pages here. There is also a generous reference listing for those of us who love to read and learn more. (I know there are lots of us out there!). If you are taking cholesterol as seriously as you should, you will soon realize that Cholesterol is a fat-like and waxy substance, produced by the liver. It has its place and function in the human body and system and too much of it puts your health at risk. Cholesterol forms every cell within the body. When the cholesterol level is appropriate, all is well It plays a life-giving role in many functions of the body. When cholesterol is at a good level, you are healthy and in top shape It works to build and repair cells It produces hormones such as estrogen and testosterone Produces bile acids which are proven to aid in the digestion of fat With too much cholesterol in the body, build up occurs Damage is caused to this circulatory system and clogging of your arteries result, putting you at greater risk for heart disease and stroke. Basic knowledge and competence will enable you make the most of your process and get the results that you need, want and deserve. This is why this book came to be It suggests we inform and educate ourselves, through learning about: Not falling into the trappings of food, diet and bad eating habits, poor nutrition, convenience and fast foods laden with sodium and fats, neither which is good for us at all. Why opting for a healthier, active lifestyle, eating the right kinds of foods, is the only and best way to go! Learn about different types of cholesterol, the cholesterol lowering process, and how to better understand the requirements you need to meet in order to lower your cholesterol
