Although there are different opinions on how the SEO strategies really work, everyone agrees that the main thing that you need to get is a large number of backlinks. In addition, most SEO experts agree that one way backlinks are much better than reciprocal links and the best way to get your site on the first page of different search engines. Therefore, your best bet is to focus your efforts on getting these backlinks directing traffic to your site. How you do that? There are several ways to get these backlinks and you should probably use as many of them as your time and your budget allows. Article marketing, blog commenting and forum posting are traditional methods and are always very effective. You must also join a network link, good for much more links than are available from the traditional methods. Each backlink is a vote of confidence from another site, and that explains why one way backlinks are better than reciprocal links. Search engines regard backlinks as a confidence vote directly on your website, so one way links are likely to bring more search engine traffic. However, regardless of the type of backlinks you use, you should try to get the backlinks of websites with relevant content to yours. Search engines prefer relevant backlinks to those irrelevant. On the other hand, every backlink is of value so get as many as you can.
