Regards, Thomas Salvador. P.S. How to use the .diz files? The .diz files are regular text files, you can open in your favorite text editor. The extension .diz is used that you can put the whole product as-is in a blog tool. This way you do not need to worry, that these lists/descriptions (=not-internet Marketing-content) get published on your site. The blogging tool should only process .txt-files. Hence .txt is used only for publishable internet Marketing content, but not for internal information. It is just used to make your life easier. P.P.S.
