Do you know the easiest way of generating traffic to your website has absolutely nothing to do with paid advertising? This means that if you have been shelling out a small fortune in the hopes of building a customer base with pay per click marketing, you are literally throwing money away. There is not only a more affordable method of building massive traffic funnels that will flood your website with hungry, targeted traffic BUT this strategy is faster and easier than anything else you have probably tried. Consider just how much more money you would make if you knew exactly how to position your website in the TOP search engine results for ANY keyword phrase you ever wanted to target.. This goes well beyond on-site SEO and if you are spending hours of your time optimizing your website, running sitemap generator scripts, updating content every other day and spending every waking moment trying to plug keywords into as much content as possible - you will be outright shocked at just how much time and money you are about to save. Just by spending a few minutes every day applying a handful of proven strategies, you can literally catapult your website to the top of the search engines, absolutely free. Just think of just much more traffic you would be able to generate if your website was advertised EVERY single time a prospect entered in keywords that were relevant to what you are trying to sell. Free - targeted - organic traffic flooding all four corners of your website on complete auto pilot without you ever having to pay one red cent in pay per click marketing campaigns again. I will be the first to admit, I was VERY skeptical myself.. Youve most likely heard the term backlink and up until now it might have been a blip on your traffic radar. In fact, most new marketers completely overlook the potential of setting up a powerful driving force of fresh, free traffic simply because they dont understand what back-links really have to do with traffic generation. Think of it this way. You know those photo rating sites online where you are able to cast your vote for who is hot (or not)? Every time a photo receives a positive vote, the website gives it a bit more weight. That means that the image will appear far more frequently than any other photos with a lower rating. Your websites ability to generate traffic is EXACTLY the same as the hot or not website ratings. Every backlink pointing to your website is equivalent to a vote FOR you, and the more votes you have - the more exposure you will receive from the major search engines! And heres the crazy part about all of

this.. Its actually ridiculously easy to ethically manipulate your way to the VERY top of ALL the major search engines just by following a very simple formula for building a massive network of authority backlinks (votes)!
