

# Php Autoresponder Script - Emailing List Management System

[DOWNLOAD HERE](#)

PHP Autoresponder Script is a simple yet powerful php script that allows you to build a list and make money at the same time. Here's how it works: 1. You offer a 'hard to reject' and 'very useful' free product to your prospects in exchange for their email addresses. 2. Your prospects opt-in and are presented with a One Time Offer, aka OTO, which is usually a good bargain for a high value product. 3. The viral part is, your subscribers can refer other people to your website and keep 100 profit from the OTO sales. The money is paid directly to their Paypal accounts. So there is minimal administrative and accounting work on your part. 4. The script comes with a complete autoresponder and mass mailing system. This allows you to follow up with your prospects professionally. Features: - Easy Admin Manager - Easy Manage Autoresponder - Easy Add/Edit/Delete Subscribers - Send Mass Emails - Set Up Follow Up Emails - WYSIWYG Editor - Customizable Header & Footer - and more.. If you are in internet marketing, then you should know that everything is about the list. Now you can start manage emailing list on your own server and you needn't to pay monthly costs of autoresponder service. Act now because I can't guarantee you will see this offer again. Instant download PHP Autoresponder Script to build you emailing list with ease!
