Web Hosting Profits Since 2003, I have profited from webhosting as a business offering webhosting and domain name registration services to countless number of corporate and individuals and making good income on a regular monthly basis doing it. Unfortunately however most of the people I have taught website hosting to as a business are always afraid of getting started because they feel they must be a guru to offer such a service. Nothing is however farther from the truth. Even a bum straight off the street can run a successful webhosting business without breaking a sweat and the truth is: You dont need to know a line of technical code nor even understand how Linux Servers work before you can become a webhost. In this short report, all the salient points will be covered and in a few minutes from now, you will be totally ready to start offering web hosting services to customers. Here are the topics covered to get you started fast: * How To Choose A Good Webhost * What To Buy As A Starter * How To Setup Hosting Packages * How To Create Webhosting Accounts for Customers * How To Manage Customers * Getting Help When Stuck * Creating Sales Pitches That Attract Customers * How To Add Domain Name Registration Services Your License Rights [YES] Can Be Edited With Your Name [YES] Can Claim full ownership [YES] Can be added to paid membership sites [YES] Can be packaged with other products [YES] Can be sold [YES] Can be given to list subscribers [YES] Can be given as a bonus [YES] Can sell Resale Rights [YES] Can sell Master Resale Rights [YES] Can sell Private Label Rights [YES] Can create videos/audios with it [YES] Sales Letter Included [YES] You can do just anything with it.
