

The Silent Killer!

[DOWNLOAD HERE](#)

Is there an independent risk factor for arteriosclerosis? Why is the chance of heart attacks not accounted for by known risk factors? Why is there an unexplained risk factor for myocardial Infarction? What factor is behind questionable preterm births and low birth weight? Think! How do you explain mysterious obstructive respiratory diseases and pneumonia? What is responsible for worrisome insulin resistant diabetes? How about unexplained Chronic kidney disease? Independent Rheumatoid arthritis? Increased unexplained stroke risk? Increased bone porosity of unknown cause ? Multiple brain abscesses of unknown cause? Are you thinking? How come traditional risk factors do not explain coronary atherosclerosis in a large number of patients? How can we explain the fact that known risk factors do not account for 25 of Preterm Babies? What predisposes young persons with this factor x be more likely to develop diabetes in middle age ? Consider this.... How come traditional risk factors do not explain coronary atherosclerosis in a large number of patients? How can we explain the fact that known risk factors do not account for 25 of Preterm Babies? What predisposes young persons with this factor x be more likely to develop diabetes in middle age ? And now this! Scientists started a long search because they believed there must be a factor previously neglected but lethal enough factor to give such statistics.. This factor is simple yet hidden.. Heinous yet silent scientists finally found the missing link!!!!THE SILENT KILLER!. a fully illustrated synopsis of these recent findings succinctly presenting these complex scientific discoveries in surprisingly simple language, will be a real shocker to many.
