

Payson Agentintegration Cc4

[DOWNLOAD HERE](#)

This is a script that contains a payment gateway like PayPal IPN where order status is updated immediately after the purchase is made, if Payson confirmed that everything went right. This makes SLUSHY extremely useful if you sell downloadable products, it gives your customer the opportunity to download a purchased product immediately after payment and you must do something. Try like how it works when you shop in our store. News in Version: 4 In the new solution need not have the client opened an Paysonkonto before a payment is made, but all in a smooth flow. Prerequisites to use this module: 1. You must have signed up to Payson agent integration and have received a AgentID and a hashnyckel. These must be specified when configuring Payson gateway in admin. 2. Your Default Currency must be SEK (Swedish kronor). The amount sent to Payson is in the default currency, so if it is for example U.S. dollars, so the customer pays only 4 kr for something in your store will cost \$ 4. Payson Agent Integration Ver. 4 Agent Integration means that you integrate Payson in your store at a more advanced way, which among other things, allows you to automatically get answers to the store. Agent integration requires that you get a ". MD5 key of Payson, which you get by contact Payson. License for one (1) Web installation
