One of Vic's aims was to create the ultimate cheat book which would work on the majority of machines found in the world today....After weeks of very late nights and extremely stressful typing sessions he created this book. (rewritten and updated in 2004) - The information in this book is highly secretive - It contains many systems that have never before been revealed to the public. But now Vic has decided that it is time for the secrets to be let out!! These systems are very powerful, and the potential amount of money you could make is quite ridiculous.
