Making your first \$100 online is easy. Actually that's not quite true actually earning your first \$100 online IS pretty easy and what I'm going to show you in this book makes it easier. Whats hard is believing you can do it, and sticking with the method. Once you've made \$100 then replicating the system is easy. You know you can do it, your sub-conscious belief system kicks into place and before you know it, pulling in \$100 daily will be a pretty simple matter. Its that first step that takes some doing. So much so that I think its easier to make \$1000, \$10,000 or \$100,000 online that it is to make \$100. Take that first step, jump that first hurdle and youll never look back. The best, simplest and easiest way to start is selling other peoples products as an affiliate. There's very little risk, the setting up is quite straightforward with a little help (that's what this book is for) and the results usually speak for themselves. So lets start with the first \$100 If you see this method through to the end that is until you're actually banking money that YOU have made online, then I promise you your life will change. You'll see the potential of the internet and a huge feeling of pride will swell up inside you because YOU have taken nothing but an idea this book and turned it into cold hard cash. That puts you in the 5 of people who actually do something with information - no mean feat in itself. But I said there were more rewards than your first \$100, and there are.
