Here are a couple of possible options that you need to avoid like the plague if you want to succeed online: You could try PopUps - but wait a second. . . . EVERYONE HATES POPUP WINDOWS - ME. .YOU. . AND MORE IMPORTANTLY YOUR WEB SITE VISITORS. If theyre not already running XP service pack two which blocks PopUps or the Google Toolbar (Which can also block PopUps) or any of the hundreds of software programs designed to block PopUps (and therefore your promotions) - then I guess theyll just get annoyed when they visit because your hitting them in the face with your adverts. And thats not the best way to start your relationship with them is it? MAGIC BUTTON USES ADVANCED DHTML SCRIPTING AND CANNOT BE BLOCKED BY POPUP BLOCKERS! How About Option Number Two? Have you seen those drop in / flying Ads, the ones that bounce into view just as youre halfway through reading the headline - (now what did it say again?) Youre distracting your visitors from probably the most important first few seconds of their visit. People just shut them down straight away but youve also lost their attention. Magic Button cant be blocked, it wont distract your visitors and instead of making them angry theyll be wanting to click your button and your tempting offer as soon as they see it. Dont mistake Magic Button for an inferior solution - its effective, it works - and its guaranteed or your money back.
