

Learn And Grow With Mrr

[DOWNLOAD HERE](#)

You've purchased this product with full Master Resale and Redistribution Rights. More The Best Products with PLR or MRR at lucky7.tradebit.com Why? This is the question we parents are always trying to answer. It's good that children ask questions: that's the best way to learn. All children have two wonderful resources for learning -- imagination and curiosity. As a parent, you can awaken your children to the joy of learning by encouraging their imagination and curiosity. Learn And Grow is a collection of 5 ebooks on different education and health topics intended to help you make the most of your child's natural curiosity and guide them towards a healthy lifestyle. Teaching and learning are not mysteries that can only happen in school. They also happen when parents and children do simple things together. By doing things together, you will show that learning is fun and important. You will be encouraging your child to study, learn, and stay in school -- important goals for any child. This collection is a way for you to help meet these goals. It will give you a short run-down on facts, but the biggest part of the book is made up of simple, fun activities for you and your child to do together. Your child may even beg you to do them. It has been said: "The first teachers are the parents, both by example and conversation. But don't think of it as teaching. Think of it as fun." Included in this outstanding collection are the following titles: Long-term good health is less an accident than the result of good habits and wise choices. To enjoy good health now and in the future, youngsters must learn how to eat, exercise, sleep, control stress, and be responsible for personal cleanliness and reducing the risk of disease. Your child's ability to learn and the chances for a longer and more productive life can be greatly improved by developing and following good health practices. When parents help their children learn to read, they help open the door to a new world. As a parent, you can begin an endless learning chain: You read to your children, they develop a love of stories and poems, they want to read on their own, they practice reading, and finally they read for their own information or pleasure. They become readers, and their world is forever expanded and enriched. Most parents will agree that it is a wonderful experience to cuddle up with their child and a good book. Few people will say that about flash cards or pages of math problems. For that reason, we have prepared this book to offer some math activities that are meaningful as well as fun. These activities use materials that

are easy to find. They have been planned so you and your child might see that math is not just work we do at school but, rather, a part of life. Today educators are working to promote the study of history in the schools and at home. Knowledge of our history enables us to understand our nation's traditions, its conflicts, and its central ideas and values. Knowledge of world history enables us to understand other cultures. We hope to encourage children to love history and to enjoy learning about it. This book is a tool you can use to stimulate your children's active involvement in the history that surrounds them every day. It's never too early to think about the benefits of a college education and about ways to put college within reach both academically and financially. Throughout their school years, students will make decisions that affect whether they will be eligible to enter college. You, working with others, can help your child make these decisions wisely. This book is designed to help you with that process. It will help you work with your child and with your child's teachers and guidance counselors, to ensure that he or she has the option of going to college. Invest wisely in your child's future today by ordering the Learn And Grow collection. At only 1.99, it may be the best investment you will ever make! Tags: mrr
