Say Goodbye to Spyware Forever "You dont have to be a tech wizard to remove and avoid spyware. Let me show you how Say No To The Hackers And Spys, And Keep Your PC Safe From All Interruptions Popups and Scams Today with a Few Easy Steps From: First name Last name RE: Spyware Prevention

There are approximately seven billion people in the world, and 1 in 6 are said to have access to the Internet. The world as we know it is now a great deal smaller and interaction with friends and acquaintances across the world is like taking a walk to a neighbors house across the street. That's one of the reasons for the Internet's enormous potential for crime! There are so many people online the odds of crime are inevitable Most guys using the internet are average people who mind their own business. However there is a small minority which is growing who are not so average at all. Hackers! These organized crime gangs want your details, bank account numbers and most of your money. Its these people who setout to make your life a living hell. Not on purpose by any means, You are not necessarily a targeted victim, you are within a bunch of targeted victims. Stay Ahead of The Game and Beat the Virus Spreaders Have you ever clicked a link in an email from your bank asking you to update your password? Well you have just joined a club of millions of guys in the same boat as you. Do you not find it strange when you receive an email from a bank that you are not even in? These banking emails are not just sent to you, they are sent to millions of people with one intention. Collecting YOUR DETAILS! It could be you one day! We want to prevent this and within the Spyware Protection eBook, you will learn how to: Prevent hackers from invading your privacy Staying up to date with the latest tools Prevent Bombarding pop-up windows Say no to the slow computer Computer crash prevention And much much more Realize Where You Stand With the Criminals and Fight Back There are a number of ways to staying safe online and we want to teach you the ways to do it! We are not going to simple tell you to go out buy the latest spyware prevention software as this does not always work. The hackers are contently changing and updating their techniques, so you need to update your own. There are a few simple techniques you can do today to prevent spyware. Increase your browser security If the security settings on your browser are set too low, you can get spyware just from visiting a web site. Ensure sure your browser security setting is at least at

medium to prevent spyware. Practice safe web surfing habits Use caution while downloading and installing software programs downloaded from the Internet. Ensure you only download software from guaranteed and reputable sources specifically used for downloads. We want to help you take control and allow you to: 1. Get an edge over the hackers and be safe 2. Enjoy a clean PC and never be scared again 3. Learn to spot the differences between fake and real emails 4.
