

Hotscripts Clone Script - Fully Working

[DOWNLOAD HERE](#)

Create your own hotscriptlike site, a portal of free and commercial scripts available on the net. This script is very easy to install and implement. You can also easily modify the looks of the site if you want to. It only use single template file and one css file for easy modification. As startup of your script and software portal site, I included more than 10,000 entries. Here are some features of the site: - 10,000+ scripts/software entries sites - Display Most viewed scripts/Software - Display Top rated scripts/Software - Display Newly added scripts/Softwares - Visitors can submit their scripts or softwares in the portal. - Member should register first before they can submit their items. - Visitors may rate specific Item in the site - Visitors can cast their review... - Tell a friend feature so that visitor can tell about the script right away to their friends. - Members can edit, delete, or add items - Easy to change design and look. The site only use single template file for you to easily change its look. - Contact Us Form, that will help your visitor contacts you right away... - Display Total hits for ever item in the site Admin Area: - Add new item to the database - Approve or deny submitted items - Manage the entries(delete, edit) - Able to add new categories - Send email to members bulk or individual See the working demo of this script: gosocialbusiness.com/hotscripts-clone-script/
