GrafitHEME The GrafitHEME theme for wordpress was created by teamfresh. live demo at grafitheme.info

Concept. The concept is for a fast loading & clean looking site that only shows off your content without any unneeded distractions. This theme could have been created using lots of graphics but this type of design decreases site loading times as well as distracting the surfer from why they are really there.

Stylish When you fill GrafitHEME with your content it will be shown in the most modern and stylish ways

Subtle yet classy and non distracting touches have also been added such as menus with transparency, and from the lightbox video effect (also can be used on images) to The Piecemaker and the Nivo slider All your content will be the only thing that catches the attention of your website visitors! Cross browser support. dont you hate it when your site looks one way in chrome but then it appears different in firefox or internet explorer? Graffitheme is coded with this in mind and supports all major browsers. ie: GrafitHEME is HTML5 & css3 valid. no errors This means that it will look the same in all browsers and it is future proof. Support Yes Graffitheme comes with 24hr support! If you purchase the theme and want to change something about it we can show you how or even do it for you if you get stuck. Want a totally new feature? We have a feature request area where you can post your suggestions and if they are good then they will be included in the next release of GrafitHEME! grafitheme.info/feature-requests/ Have a dig around the site to see the way it is laid out and if there is anything else you want to know feel free to drop an email to teamfresh@hd-fractals.com Edit
