Less Than 2 Of Businesses With Websites Have A Mobile Optimised Version Of Thier Website... Can You Say.. GOLDRUSH 2012? Getting In NOW With A Set-Up Service That 98 Of Businesses With Websites NEED... Will Position YOU So Far Ahead Of The Curve You Competition Will Wonder How You Are DOMINATING THE MARKET! Dear Friend, You are fortunate enough to be in front of one of the HOTTEST current & future internet trends.. in its infancy. It will only skyrocket from the point its at now AND WILL prove to be not only a trend.. but will become STANDARD EQUIPMENT for ANY web presence. Of course this trend is MOBILE OPTIMISED WEBSITES. With more than 20 of internet users using ONLY their mobile device to surf the net.. ANY business that does not have a mobile optimised version of their site is effectively IGNORING hundreds of millions of potential website visitors. This fact ALONE is usually enough to convince a potential client to shell out the cash to have a mobile optimised version of their website made for them.. or at least.. piques their interest enough to listen to further arguements for having one made for them. Frankly, its like taking candy from a baby, selling this to businesses that already have a normal website. BUT.. its tough enough to create a normal website.. and tough meaning; time consuming to do yourself, expensive & risky to outsource, difficult to learn to write the code yourself, etc.. let alone creating mobile optimised websites. Because this is such a new trend.. there are very limited resources for helping you to create mobile optimised websites inexpensively and easily... .. especially if you are not technically minded or skilled (or LAZY thats me lol). ... until now... Introducing... Mobile Site Machine! This software is EXTREMELY easy to use. Start by filling in the blanks with the company information (name, address, phone, email, etc.) Then pick the colours you want (youll see how to quickly and easily match your clients normal site colour scheme). Then all you do is copy the content from the normal site that you want to be in the mobile site and paste it into the software when prompted. The software will create up to ten mobile optimised pages for the content you are copying & pasting.. PLUS a Contact Us page and Find Us page integrated with Google Maps are generated automatically. Once the software has created the mobile site.. you just upload it and youre done!

Software Features: Choose your preferred Font type (Arial, Courier, Helvetica , Times New Roman,

Verdana) Adjustable Menu Font Size (use large size for short menu text or small size for long menu text)
Optional Header/Logo Image (instructions for using the clients logo from their normal site included)
Optional Click To Call Image (import an image from your computer or use the default text) Project SAVE
Feature (so you can easily make any changes after creating the site) What Can You Do With The
Software?.. - Use it to build you own network of mobile optimised websites - Use it to build mobile
optimised websites for your offline clients - Build pre-made mobile websites and sell them on Flippa - And
thats just a few ideas... So.. what do you get?.. 1. The software app that creates the entire Mobile
Optimised Website 2. A video walk-through of the software being used to create a mobile optimised
website 3. A video tutorial on using FTP to upload files to your webhost (just in case you need it) 4. A
resource file with optional free supporting software (image manipulation, FTP, etc.) 5. Redirect scripts
