

Wordpress Covert Links

[DOWNLOAD HERE](#)

Very simple to install and use Plugin that cloaks any link using your domain name. Helps Prevent Stealing Of Commissions And Increases Clicks Through Rates As Links Appear To Be Internal To Your Domain

Dear Online Marketer, The sad fact is people do not like to click on affiliate style links... Even worse, is the fact that many people will bypass your affiliate links by going directly to the product website. Then you have the commission thieves that rob you of your hard work... You can now prevent this with a very simple Wordpress plugin! Introducing Wordpress Covert Linkz! Installing is a snap and using is dead drop simple: - Enter your link title keyword - Enter ANY link under the Affiliate Link Column - Click Save Links!

In the screenshot above, you will notice that I cloaked a Clickbank affiliate link on a test site: wptest.411center.com/wizard-plugins That is the cool thing about the plugin, it makes any link appear as if it is part of YOUR domain! That is all there is to using the Wordpress Covert Linkz plugin. Once you have the link saved, you will be able to use it anywhere, on your blog, forum signatures, or any place that you want to have covert links.
