Tired of wasting your time & hard earned money on "intelligent" programs which promise to make you rich overnight? Then read on, because I am going to show you..... How I made over \$2000 in just 10 days using a ridiculously stupid technique I stole from my own affiliate Now that you have seen the proof and I have your attention, let me ask you one quick question - how much of your hard earned money have you wasted on "intelligent" money making programs which promised to change your life overnight? How many times have you been bluffed by the so called Gurus into buying their fancy and overpriced products? And what returns do you have to show for that? Nothing, right? You have spent \$47, \$97, even \$197 on these super intelligent products hoping to start a fruitful online career but each time you failed - failed to make even a measly buck. Let me tell you - it's not your fault. And, mind you, it's not the Guru's fault either. You see, these overpriced products may have some merits. In most cases, they do. The problem, however, lies in the fact that these Gurus just can't relate to you. These are guys who earn \$5000 each time they send an email to their subscribers. What the heck do they know about a guy trying to make his first buck online. Agreed that some of these guys were in your shoes once upon a time, but times have changed now. What worked for them 5 years back is not going to work for you now. And this is what pisses me off. These Gurus know that their ebooks, although useful to some people, are not going to help a newcomer make his first buck. And yet, they push it to you. Just last month, a friend of mine called me and he sounded furious. He had just bought one of those fancy, \$97 ebooks and was cribbing that he couldn't make a single cent using the techniques mentioned in it. I tried to explain to him that this ebook is not meant for newcomers, although the owner was pushing it hard as a newbie product. What he said next stunned me. He said - "You make a lot of money online. Why don't you tell me how to make my first buck on the net" I had no answer. How could I tell him that although I make a full time living on the Internet, I really had no advice for him. You see, I have been a successful Internet Marketer for over 4 years and I have learnt a lot over the years. But I am almost at the top of the learning curve now. I could teach him all the advanced stuff (just like the Gurus) but the first online buck..... No, I had no clue then. That day I got off the phone with some weird excuse but promised to get back to him. I was quite

disappointed with myself and the way I handled my friend. After a lot of thought, I made up my mind. I decided to go on an underground mission. A mission to closely monitor the activities of some of my own affiliates. I spotted one affiliate who I knew had no prior experience in making money online. But he started making hundreds of dollars in affiliate commissions almost overnight. I knew this because I could see his sales statistics right in front of me. It was obvious that this guy had found a technique which was doing wonders for him. It was like he had struck on gold. With each passing day, his sales increased. At the time of writing this report, this affiliate was making over \$350 a day. I decided to reverse engineer on this guy's technique. Well, I had a few notions about what he might be doing to make this kind of income. I analyzed my website stats to back track what he was doing and confirm my hypothesis. Where was he sending the traffic from? Did he have a website? Was he using Adwords? Or marketing to a safelist? Perhaps, he was into blog, tag and ping? Maybe building his own list? Promoting in social bookmarking sites? Oh, he could be a member of those "email your downline" kind of sites? Maybe, maybe, maybe? I had all these notions and more. But I was wrong - dead wrong! What I discovered sent my head spinning. I was stunned! This affiliate was using a ridiculously stupid technique to make over \$350 a day in commissions. And I haven't even told you the best part - he did this without spending a cent, with no website whatsoever and none of those super intelligent stuff which you have been fed time and again. I had seen enough. The world was spinning around me. I needed to rest. But first, I had to try this technique myself. I wouldn't be able to sleep until I did. So I grabbed a cup of coffee and for the next 2 hours, devoted myself to implementing this stupid technique. It was only then that I could get some sleep. Next day, I woke up and the first thing I did (yes, even before brushing my teeth) was to check if I had made any sales. And this is what I saw on my laptop screen: Yes sir, that' \$171 earned for just 2 hours of doing something very simple and stupid. I couldn't believe my eyes. No websites to design, no ads to spend on, no emails to send, none of that jazz which I have been doing over the last 4 years. And I had an additional \$171 in my account. Now I was completely excited. I sat down and started working on it further. I replicated, analyzed and fine tuned the technique till I could make it into a system. Within ten days, I had perfected it. At the top of this letter, you saw how my sales grew to \$278 a day using this simple system. A system which is fool proof, stupidly simple to implement and that any newcomer can use to make his first buck & more online. A system which I now call "On Demand Profits". Yes, using this system, you can make money on demand - it's like your personal ATM Machine. And yes, even those

experienced marketers out there can use it to add to their bottom line. And unlike them, I am not going to charge you an arm and a leg. If I did, how would I be any different from them, right? So I will give it to you for less than 10 bucks. More on that in a bit. But first, let me show you the benefits of the "On Demand Profits" system: The system is completely risk free.
