There is no doubt that you can accomplish anything if you put your mind into it. The only problem is that many people do not know how to use their minds to their best advantage. Greetings Friend, Is there any instance in your life that you refuse to do a particular job, say joining a beauty contest or singing in front of a crowd, because you think you can't do it? Too bad You haven't started the competition yet, but you have already lost. That's true! Losing is not about not being able to win; it's more about not even trying. So, the moment you say 'no' to something, it's just as bad as giving up and accepting your failure. You wouldn't want to be a loser, would you? On the other hand, real success is not always about being able to reach your goal, or winning that gigantic trophy; rather, it's more of standing up after every fall and never losing hope to finish what you once started. Really, there's no harm in trying. The real harm is not believing in yourself - making you worthless and insignificant! When you don't believe in yourself - what you can be or what you can do - all you can say are superficial thoughts such as I am not good enough, or I can't really do that. The Mind is So Powerful that Once These Thoughts Enter Your System, There Will Be No Turning Back! When you think you are not capable, you truly will not be good enough and you won't really be able to do a certain task. If you could only understand thoroughly how the human mind works, you'll realize that it is so much better if you fill the mind with positive ideas in order to create positive reality. Fortunately, I have prepared and compiled in a single report called I Can.
