The .diz files are regular text files, you can open in your favorite text editor. The extension .diz is used to enable you to put the whole product directly in a blog tool. This way you do not need to worry, that these lists/descriptions (=not-credit-content) are published on your site. The blogging tool should only process .txt-files. Hence .txt is used exclusively for publishable credit content, but not for internal information. It is just used to make your life easier. Buy 25 credit PLR articles, #26 now! Tags: credit cash
