WARNING! The book you are about to read contains extreme Blackhat Marketing Techniques and ideas that are not just frowned upon by the Myspace community, they will get your accounts CLOSED DOWN if you aren't careful and do not stick to exactly what I say. Myspace marketing is ridiculously lucrative, but carelessness will cost you accounts. You have been warned! in-depth information and step-by-step case studies. If you apply these techniques, you WILL make money. There is no luck or skill to it, its simple cause and effect. Myspace marketing is not hard at all, and once you learn the ropes and begin to profit, you control how much you want to earn. You can write your own paycheck basically, by deciding how much effort you want to put in. As you have probably gathered by now, this book is dedicated to showing YOU exactly how to make money from Myspace, the worlds number one Social Networking site, and a huge site in its own right. Social networking is something that is HUGE worldwide, and many people believe it to be the next generation of web usage, making the internet as much a part of our everyday lives as a television set or telephone is these days. It may seem far off but 15 years ago who had a cellphone? A few people. And now who does? EVERYONE. See my point? In short, Social Networking may be the thing that makes the internet a necessity in peoples lives. But What IS Social Networking? Thats all well and good, but what exactly is social networking? The following definition is taken from Wikipedia.com- The first social networking website was Classmates.com, which began in 1995. Company of Friends, the online network of Fast Company, the preeminent "new economy" business magazine, launched shortly after, in 1997 and introduced business networking to the internet. Other sites followed, including SixDegrees.com, which began in 1997, Epinions which introduced the circle of trust in 1999, followed by European equivalents Ciao.com, Dooyoo and ToLuna. It was not until 2001 that websites using the Circle of Friends online social networks started appearing. This form of social networking, widely used in virtual communities, became particularly popular in 2002 and flourished with the advent of a website called Friendster. There are over 200 social networking sites. The popularity of these sites rapidly grew, and by 2005 MySpace was getting more page views than Google. Google has a social

network called Orkut, launched in 2004. Social networking began to be seen as a component of internet strategy at around the same time: in March 2005 Yahoo launched Yahoo! 360, their entry into the field, and in July 2005 News Corporation bought MySpace. In these communities, an initial set of founders sends out messages inviting members of their own personal networks to join the site. New members repeat the process, growing the total number of members and links in the network. Sites then offer features such as automatic address book updates, viewable profiles, the ability to form new links through "introduction services," and other forms of online social connections. Hopefully that has made things a little clearer, although to be blunt, it doesn't really matter if you understand it from an academic point of view—we are making money from it, not writing a term paper, and besides, as soon as you log onto one of these sites I'm sure you will understand exactly what's going on there! It's basically a big group of people hanging out and making friends!

Necessary Items What you will need to use social networks to make FREE money- *A copy of this ebook *An internet connection. There are various links and things that you are going to want to click on, so it's a good idea to be connected to the net while you go through this.

*Some time. Not a lot of time, true, but you will need to commit to a certain amount of time each day or every few days. It all depends how soon you want the cash flow to start! Myspace is a very fertile place to make money at the moment, and the techniques and ideas are all pretty simple once you get the hang of them. It's actually amazing how much money can be made from such simple techniques. Best of all, there is no real limit on what you can achieve. If you put the time and effort in, it's more than possible to make money within a few hours of starting out. As far as realistic earning potential, earnings of \$100-\$200 per day are not at all difficult, and the best thing is that when you find something that works for you, you can just replicate it over and over again and replicate those profits too! Not bad at all for something which costs absolutely nothing to start!
