Taking and expanding the reverse auction website concept, this website offers registered the chance to bid on auctions and pay a fraction of the retail price. The website owner has the ability to control all aspects of the website, from adding and editing auctions, to refunding bids and suspending users.

Features: 1. cakephp based full ajax framework 2. comes with 9 amazing templates (no other clone has it) 3. no kind of encryption at all (no other clone features) 4. and many more... You will find inside the package a Self Extracting Archive that contains the script and install instructions. If you follow them exactly, the script will work fine. The script was recoded by ME, so that the mail function works perfectly on any webserver, that means that this script is unique, tested and working !!! An exact working clone of Swoopo / Telebid / Grababid website using the Penny Auction method. Upload all files to the server. It includes several templates for changing the layout. Please check the features and server requirements before you order. Because this is a digital product, there are no refunds once the product is delivered. please keep this in mind There are no refunds for this product and Complete set of installation information is provided with this product. If there is problem with the script then it is from the server side as shared hosts have a lot of restrictions; prefer dedicated host service. We do not provide any Installation and Product Support. If You Need assistance with installation we recommend you scriptlance, there you can get installation support for a low price. when you are Buying this product you are agreeing the the above terms and conditions any violation will be dealt.
