

Create Live Ebook

[DOWNLOAD HERE](#)

More and more people are writing their own eBooks nowadays. However, the question of which format to use to produce your eBook is a common one. Many people choose PDF format. PDF looks great and some would say it offers the opportunity to reach a greater audience as MAC users can view this format when they cannot easily view eBooks in .exe format (executable file). On the other hand, although affiliate links can be placed in your PDF books, one cannot earn money from Google AdSense clicks and ad banners as one can with a live .exe eBook. PDF eBooks can also be viewed off-line (you do not need to connect to the internet to view the eBook)
