(Plus you get the complete rights to sell this great product and keep 100 of the profits in your pocket! Dear internet friend... Im already taking heat from some web marketing gurus for revealing this information here. But you know what? I dont care! Their secrets have been hidden long enough and in my opinion it is about time that someone actually showed *you* the exact steps to create a mini-site that makes mega-bucks... sites like the ones those gurus are using to build their online empires every passing day. In case youre still not familiar with mini-sites, let me give you a brief explanation of what they are and what they can do for you... An insider-look at mini-sites: Mini Sites are simple (but powerful) one or two page web sites that sell a product -- usually, an infoproduct. These apparently harmless sites, when done correctly are unstoppable money-making machines. If youve been on the net some time and if youre interested in the topic of online marketing, Im sure that youve seen some of the sites Im talking about... and chances are you even bought from several of them. Right? Yes, thats how powerful they are... Actually, mini-sites are in my opinion the perfect web business. And how couldnt it be if... * Mini-sites are quick and easy to produce * Mini-sites allow you to test your marketing on the go * Mini-sites provide instant results * Mini-sites have *huge* response-rates The fact is that if youre still not embracing the power of mini-sites to sell your products online, you might as well quit the online marketing race altogether and flush your money down the toilet! But be warned: Slapping up a one-page site and hoping to make a zillion dollars in sales is not all it takes.
