Web Audio Software

DOWNLOAD HERE

Web Audio Software Uses The Same "Trick" That Professional Broadcasters And Sound Engineers Use To Take 'Normal' Voices And Turn Them Into 'Gold'! So how do they do it? Simple, they add a background loop behind the voice track that masks all the imperfections, and makes them virtually disappear. That one simple, yet amazingly effective "trick" can dramatically improve the rhythm of your marketing message, and bring your "ho-hum" audio to life. Now look, this method of improving voice-based audio tracks has been used by the professionals for well over 50 years, but up until now, it was nearly impossible for the average person to do. Until just recently, adding a background loop to your voice-based audio required specialized audio editing software, a wealth of technical knowledge, and even then, could easily cost you hours of your valuable time. With all those obstacles to overcome, is it any wonder that so few marketers were using this deadly effective technique? What Makes Web Audio Software The Perfect Solution? This easy-to-use application was designed by marketers, for marketers, making Web Audio Software the perfect solution for all your online marketing needs. Web Audio Software is obviously a superior solution. It is the only point-and-click program, designed specifically for marketers, that puts the power of a professional audio engineer to work for you. Still not convinced? Just take a look at this amazing list of features. After you see everything Web Audio Software can do, I think you'll agree that it's clearly the best choice : All In One Solution - Record your audio, add a background loop, and create your Flash based audio player using this all inclusive program. No expensive, and confusing external software needed! 10 12 Professional Background Loops - The background audio loops included with Web Audio Software were designed by the Internet's audio marketing expert, Mike Stewart! When it comes to marketing online with audio, there's absolutely no one better than "The Internet Audio Guy". Instant Streaming Audio - Your audio starts in seconds, not minutes, regardless of whether your visitors are on dial-up, or a high-speed connection. Make your impact right away. Automatic Fade-Up & Fade Out - Wrap your voice-based marketing message in a perfect introduction, leading with a perfect induction, and closing with ease. It's point-and-click easy to give your audio the professional sound that will blow your visitors away. Exclusive "Affiliate Jump" Technology - Let Web Audio Software automatically forward

your visitors to the website of your choice at the end of your audio. Send your conversions through the roof using this exclusive technology for affiliate promotions, teleseminar playback, and more! Customizable Your Audio Players - Web Audio Software lets you customize your audio player, choosing from 6 stunning player styles, allowing you to choose any color under the sun, and letting you size your player to fit in even the tighest of locations. Run Multiple Players On One Page - While this might seem obvious, you'd be shocked at how many audio solutions don't let you allow you to put multiple players on a single web page. With Web Audio Software , that's never a problem. Use Existing Audio Files - With Web Audio Software , you can either record a brand new audio file within the program itself, or make use of any existing .mp3 or .wav audio file on your computer. No Monthly Fees - Why pay another company to host your audio messages when you don't have to? With Web Audio Software , you host the audio on your own web server, and never have to worry about your audio going offline, or paying outrageous bandwidth fees. Are you starting to see how using Web Audio Software can help you build trust, increase conversions, and take your business to new heights? "Web Audio Software " Is Point-And-Click Easy. If You Have A Microphone, And Can Copy and Paste, You Can Add Streaming Web Audio To Your Website In Minutes!
