Imagine Having Your Own Virtual Vending Machine that collects \$10, \$20, even \$50 Bills Even When You're Out Doing Something Else! "There's absolutely no way to describe the incredible feeling of opening my e-mail and finding it full of \$10 bills!" Computer "Geek" Reveals How He Quietly Collects \$10 Bills From his 24 Hour Automated Virtual Vending Machines! Dear Internet Friend, It's absolutely true! I do collect money in my inbox nearly every day - even while I'm off doing something else! Hello. My name is James Pearson I'm the owner of several virtual vending machines which regularly pay me \$10, \$20, even \$50 or more each! I truly can't begin to tell you how amazing it feels opening up my e-mail and finding that it's filled with money! How it all started .... You see, I'm really a computer "geek". During my day job I fix computers. Last year, things started going badly and I was afraid of getting "the ax." Instead of sitting around and waiting for it to happen I decided to take some real proactive action. I devoured everything I could get my hands on that has to do with marketing. I began writing sales letters for our company to attract new business. It worked! And it worked very well! At the same time, I made an arrangement with my boss that allows me to take all the sales letters and marketing materials I create for him and resell them to other computer companies like ours. I packaged them up and started advertising them on the Internet. This is how my first virtual vending machine was born! Every virtual vending machine I add to my collection just makes me more and more money! I didn't stop there. I decided that I was not going to let my destiny be controlled by someone else. I have a wife and two beautiful little girls that depend on my income. I began creating more of these virtual vending machines whenever I could. I found that, with a solid idea, I could set up a new one in a weekend. With each new "machine" in place, my income grew! My machines now run on "autopilot" The absolute greatest thing about my virtual vending machines are that they practically run on autopilot! Yes, it takes some time to get them initially set up and running, and a little bit of testing, but that only takes me about a week or so. In that time I can tell if I have a real moneymaking winner on my hands. After that I only spend about 10 to 20 minutes a day on each one! That means that I can spend time doing other things that I enjoy, like spending quality time with my family! Unlike "real" vending machines, these virtual vending machines Never require refilling Never need

maintenance Don't cost me anything to start up (that's no investment) Don't require me to leave my house (I do everything from the comfort of the laptop at my kitchen table) See exactly how my virtual vending machines work I can't begin to tell you how easy this has all been. Honestly, I was surprised that it worked! I've tried more "get-rich-quick" schemes and business plans than I care to remember. I've lost thousands of dollars throughout the years trying them all. It wasn't until I discovered the secret behind the virtual vending machine technique that I started to actually make some money without it costing me a fortune! I've recently completed my latest project Virtual Vending Machines - Automated \$10 Moneymakers! In my new manual I show you exactly how my machines work! I give you the insider's look at how I make money almost every day. Plus, I give you step-by-step instructions for setting up your very own virtual vending machine. Forget making 25 cents from a gum ball machine that you have to travel around town to service every week! Instead, imagine getting up in the morning and finding your e-mail inbox filled with money! It's almost too good to be true! Starting Your Own Moneymaking Virtual Vending Machine is Easy if You Follow my Step-by-Step Instructions. I've left nothing out. I want you to be truly successful with your own virtual vending machine! I'll take you through setting up your own money maker. Plus, I'll help you create as many as you want - each one raking in \$10, \$20, even \$50 bills! Be warned! This is probably the most "plain" manual you'll ever see! Unlike some of my other manuals, Virtual Vending Machines is probably one of the most no-frills, even "boring" looking that I've created. You see, I sat down to write a useful, moneymaking instruction guide. There are no graphics, not even any clip art. My grammar may disturb you, and I haven't spent a great deal of time trying to impress you. What I have done is put together a no-nonsense look at what I currently am doing to make money! I've written it in such a way that anyone can understand and implement it. It is however, packed with examples and links to my virtual vending machines so you can see real life examples. I've also included my own personal collection of resources for you to use. These resources will give you everything you need to create and install as many virtual vending machines as you want! So, if you're looking for some fancy manual with lot's of pretty graphic and layout, this isn't it. This isn't some get rich quick scheme or anything like that.

I've tried so many of those things I'm sick. If you're looking to get rich over night then don't order this manual! If, however, you're interested in making an extra \$100 to \$500 or more per week (depending on how much you put into your business) then this is for you! If you're looking for an almost completely automated business, so you can be off doing something else and still make money, then this is for you.
