

# Faa Airplane Pilot Training Kit W/ 2012 Far Aim

[DOWNLOAD HERE](#)

Finally, everything you need for Private Pilot ground school in one place! All documents are Official FAA Publications. Up to date Free subscription for 1 year In one place All documents fully indexed Save time and \$\$\$ Use this library to pass written tests, to prepare for oral and practical tests, to plan flights, to keep current and to pass bi-annual reviews. Covers Sport, Recreation and Private Certifications. Contains almost 100 electronic handbooks, guides, regulations, bulletins, templates and tools. Numerous companies (Jeppesen, King, ASA, Glems, etc) make a living supplying this information in slightly different formats. The Jeppesen Kit costs over \$425: -Private Pilot Manual (List price: \$73.95) -Private Pilot Maneuvers Manual (List price: \$19.49) -Private Pilot Stage Exam Booklet (List price: \$7.49) -Private Pilot Practical Test Standards (List price: \$6.49) -Private Pilot Practical Test Study Guide(List price: \$22.95) -Private Pilot Airmen Knowledge Study Guide(List price: \$18.49) -GFD Presolo Written Exam (List price: \$4.49) -Private Pilot Airplane Exam Pack (List price: \$22.49) -FAR/AIM Manual (paper) (List price: \$19.95) -Pilot Logbook (List price: \$13.49) -TechStar Electronic Flight Computer (List price: \$69.95) -Private FliteSchool (test preparation software) (List price: \$159.95) -Aviation Weather Services (Paperback) (List price: \$16.95) The fact is you dont need to buy any of these multi hundred dollar guides or even to pay for a ground school. Advisory Circular (AC) No: 61-65D states: COMPLETION OF GROUND TRAINING OR A HOME STUDY CURRICULUM. Ground training courses to prepare for the aeronautical knowledge test may be offered by pilot schools, colleges, aviation organizations, and individual flight or ground instructors Home study curriculums individually developed by students should be compiled from material described in the applicable FAA knowledge test guide. This kit puts those materials in one categorized electronic library for your success (see listing of content below). In many cases, these are the same documents sold by the recognized companies. In all cases, the material is the final authority in answering test and regulatory questions and is as good as or better than what is sold. I have also included many time and money saving tools available in the library and reference to online tools to assist with planning, weather, research and training. All are free with this kit. Save your money for flight time. The material in this kit is compiled from publicly available sources and research and

documents created during my pilot training. Using this material, I got a 93 on my test and passed check rides on the first try. I'll also give you the tools to make all this information portable so you can take it with you on your Palm, etc to study or reference. I paid another company over \$15 just to get the regulations. After a cumbersome process of loading their software and data libraries, I found their files were so large I could only fit one section of the FAR on my memory. After much research, creating my own website and removing some of the larger pictures, I got this information much smaller. Now, this is all I carry with me even to flight reviews. ----- Yes, Get access to

free, unlimited, on-line testing Yes, Contains the latest edition of all Handbooks Yes, Contains the most current FAR/AIM ----- Guaranteed Success We will refund, replace or repair any defective product within six weeks from the date of purchase. After six weeks all sales are final. The material in this library is compiled from publicly available sources and research and documents created during my pilot training. It is far more than a directory of documents like others I've seen without any explanations. I've put many, many hours of research into tracking, creating, cataloging and keeping current the material and tools and making them accessible. Using it, I got a 93 on my written test and passed license check rides on the first try. I continue to reference the library to stay current and plan flights. ----- Easy to Use

Everything is laid out in a logical order with an explanation of why each document is important for certification and continued piloting success. I have tried to focus on what is most meaningful and explain why. All documents are in the library in the original FAA format. All are indexed and searchable for key terms. The detail, explanations and graphics are outstanding.

----- Up to Date Each document is the current version as of the latest releases by the FAA. Other listing I've seen with this type of content are way out of date - one that I looked at has not been updated in over 3 years. You'll also be subscribed to updates of this information by download when it changes for 1 year.

----- You'll also be subscribed to updates of this information when it changes for 1 year. Please send an email to [pilots@jit-technologies](mailto:pilots@jit-technologies) with the subject Private Airplane Subscription if contact information changes. Feedback is also welcome at this email.
