How to use the .diz files? The .diz files are regular text files, you can open in your favorite text editor. The extension .diz is used that you can put the whole product directly in a blog tool. This way you do not need to worry, that these lists/descriptions (a.k.a. not-credit-content) get published on your site. The blogging tool should only process .txt-files. Hence .txt is used exclusively for publishable credit content, but not for internal information. It is just used to make your life easier. Buy 25 credit PLR articles, #30 now! Tags: credit cash
