Regards, Thomas Salvador. P.S. What is this .diz thing? .diz files are just regular text files, you can open in your favorite text editor. The extension .diz is used that you can put the whole product directly in a blog tool. This way you do not need to worry, that these lists/descriptions (=not-internet Marketing-content) get published on your site. The blogging tool should only process .txt-files. Therefore .txt is used exclusively for publishable internet Marketing content, but not for internal information. It is just used to make your life easier. P.P.S.
