You've purchased this product with full Master Resale and Redistribution Rights. More The Best Products with PLR or MRR at [lucky7.tradebit.com](http://lucky7.tradebit.com) See How Easily You Can Remove The Hacker Filth That Slows Down Your PC, Sends Your Private Information To Sleazy Computer Criminals, And Threatens To Destroy Your Machine! Give Me 45 Minutes And I'll Have You Exterminating The Dangerous Programs (Like Spyware, Adware, And Malware) That Make Your Life A Living Hell You Don't Have To Be A Computer Expert To Build A Virtual Wall Of Protection Around Your PC! Want to know the secret of securing your PC from dangerous spyware, adware, and malware programs that can ruin your PC, your finances, and your sanity? Click on the button below and I'll teach you how to win back control of your computer once and for all. Or keep reading to learn more! Have you noticed mysterious slowdowns in your computer's performance, even when you only have one or two programs (apparently) running? Have you noticed a lag in your web surfing, even though you have a very fast broadband connection? Almost certainly if you have, it's because spyware or adware is taxing your system, slowing things down for you while sending information you may not want sent, to places you almost certainly don't want it sent to. If you don't cleanse and protect your PC, you may find yourself... The victim of PC sabotage when your PC stops working the way it should... The victim of spying by dishonest commercial companies or downright criminal hackers... The victim of identity or credit card theft when hackers manage to sneak vicious invisible programs on to your PC without your knowledge... ...and even more. If you go online, chances are you're infected. 90 of Internet users fall victim to at least one (usually all three) of these vicious programs: Adware seems innocent enough. Supposedly advertising companies are only trying to match your interests to selected products. But these programs (that you probably didn't know you agreed to let on your PC) track every web site you visit and report it to agencies, and often slow your PC down to a slug's crawl. Spyware can include keyloggers that sit and wait for you to type 16 digit numbers (your credit card number)... so this vicious software can send your financial information to criminal hackers to ruin your credit. Note: Your social security number isn't safe either - spyware makes identity theft even more real. Malware can not only bring your PC's working time down to a snail's pace, it can do serious

damage to your hardware! Malware can literally destroy your PC! Unless you take a stand and destroy adware, spyware, and malware now - you may be at the hands of criminal hackers and sales companies who are out to make your life miserable! Do You Make These Security Mistakes When Using The Internet? The good news is you can protect yourself... The bad news is that this filth is everywhere now. Even from the sites of companies you trust and do business with. There are probably dozens, maybe even hundreds, of pieces of bad tracking software and viruses lurking on your computer right now. Nasty little software programs are out there which will slow, snarl or even stop your computer and your Internet connection. When you look inside my report, I'll tell you exactly how spyware, adware, and malware climb their way onto your PC. (Most people never see it coming) You'll learn how to make changes today to stop the madness. And best of all, you'll learn how to exterminate the vicious software that has already landed and infected your PC. Who Else Wants A Blackbelt In The Destruction Of Vicious Malware, Spyware, And Adware Programs That You Didn't Even Know Existed? Leaving these types of vicious hacker software on your PC can have devastating consequences. In my report, you'll learn How to protect yourself from all three sources of PC mischief: Spyware, Adware, and Malware. 2 anti-virus solutions that will wipe the floor with most variations of malware. How your ISP and email functions are already helping you to fight viruses - and where they stop being any help at all. 2 key things you must do to keep yourself safe from viruses. 4 rules to protect yourself from viruses. 5 reasons why Spyware can be much more dangerous than any virus. 5 places spyware may be hiding in your computer. 7 most common activities that can lead to Spyware getting on to your PC. 5 most common routes Spyware takes to get on your PC. 2 best Spyware detecting software programs (that you can find for free). How to set up your Internet Browser for maximum security. (If your settings don't look like this - you may be putting yourself at risk!) And believe me, I don't stop there. Finally Restore Your PC Back To It's Original, Pre-Infection Condition! My report, "PC Safety 101" is ready for you to put into action. You can download it instantly and I've made the whole process as painless as possible... And I must let you know - if you don't decide to get my report today, not only do you put yourself at greater risk, you may never get the same deal as I'm offering now. Malware, spyware, and adware are only becoming more and more of a threat. As the demand for my products and services increase, I'll have to raise my prices to keep up. Only today can I guarantee you this low rate. Click the button below now to make sure you get in on the best deal possible! Tags: mrr, pc
