Feeling out of words? Lost in the emptiness and minimalism of your instrumental realms? A single word or a little phrase can go a long way when it comes to serious dance music production as a simple hook to your track, as a uniting shout-along moment for all or even as the last straw for those who barely hang on to reality on the dancefloor. "Hyper Vocals" provide a golden box of phrases that will elevate your tracks to anthems. Electro, Dubstep, Miami Bass, Drum'n'Bass, Trance, Grime, Glitch or big room Techno no matter what genre, these vocals will top off your production nicely. The pack comes in four chapters: "Future Bots" brings you those ultra-dry, pitched and digitally twisted voices which appear to come right out of the 23rd century. "Machine Bots" showcases some of these Kraftwerky, steel-cold vocals that stiffen your spine in an instant. "Retro Bots" takes you back to the golden ages of the Daleks and Cylons with warmly droning analogue robot-speak. Last but not least, "Scary Robots" assembles a thorough selection of nightmarish man-machine utterings that seem to echo all the way from space. All of the 127 vocal samples contained in this pack have been exclusively produced for Prime Loops. Each and every sample comes fully 24Bit mastered, pre-formatted for most major music software and hardware, tried and tested and is yours to use right out of the box as well as a 100 royalty free, of course. No doubt: This selection of Vocals and Shouts will leave you speechless! This is the .wav version. You can find many other specialist formats, including EXS24, NN-XT, Halion, Kontakt, Reason Refill, .aiff and more at primeloops.com
