

Web 2.0 Covers - Stunning Looking Covers In Minutes

[DOWNLOAD HERE](#)

Dear Friend, A lot of people have been asking me for a way to create quality Ebook covers and other eCovers without Photoshop. So after playing around with some ideas, I came up with something really cool.... The basic idea behind Web 2.0 covers is this... It's a template based system. You get 8 different templates, for 8 different eCover types: So you get 1 template for each cover. What makes these templates special is: Each template has a flat and straight front cover, so you can just type your text into the template without tilting and distorting the text in any way. Very easy to use. Each template also has some 3D elements to give it a 3D look. These 3D elements are already part of the template so you don't need to do anything extra. The 3D "look" is already there, so you don't need any other software or action scripts. Which means you don't need Photoshop (but you can use Photoshop if you want to). Each template comes pre-installed with 55 different "effects" that will spice up your cover. And all you have to do is check or uncheck the effect you want. This makes creating an eye catching cover super easy. Each template also comes pre-installed with 20 different "shapes" like half circles, bars, rectangles, etc.. So you break up your cover into sections and add some more eye candy to the cover easily. Each templates is highly customizable, and each part of the template comes on it's own layer that you can customize in pretty much any way you want. Mix and match the effects, resize and distort anything you want, change colors, etc.. So with each template, you can create literally millions of different combinations of covers. So your cover won't look like all the other covers out there that are using these templates. This package also comes with 90 Web 2.0 layer styles. So you can easily colorize and add some gradient effects to any element on the cover with just a few clicks. Here are some screenshots to give you a better idea.....

These templates are extremely flexible. With them you can easily create pretty much an unlimited amount of quality looking covers, in minutes. I don't think it can get much easier than this. Here's exactly what you will: 8 templates (in PSD format). 55 pre-installed effects on each template. 20 pre-installed shapes on each template. 90 Web 2.0 layer styles. Quick FAQ: Q. Do I need any special software? A. You need a software program that opens PSD (Photoshop files). I would recommend either Adobe Photoshop or Photoshop Elements. However, you can also use any other program that opens PSD files. You can use a

good free program called GIMP. Q. Is this easy to use? A. Yes, very easy. The templates come pre-installed with all the "special effects". So all you have to do is check and uncheck some boxes, and you have a nice looking cover. Just add text and you're ready to go. How much is all this? There similar products out there that sell for \$67 - \$97 and more. I decided to make this product affordable and accessible to everyone. So I came up with a price of..... \$197 \$97 \$67 \$15 Only! But don't let the low price fool you. This is a top notch product that can easily sell for \$97. And I just might come to my senses and increase the price without warning. Take Advantage Of The Limited Time Low Discount Price Today! Yes! I want to order this amazing package right now, and take advantage of the limited time discount. Give me instant access...
