

Targeted Traffic To Any Site For Free...

Discover how to get targeted traffic to any site for free... "The people who know these secrets are quietly siphoning off all the free traffic for themselves while everyone else who tries it is left with the scraps!" Even if you master everything else, without a steady stream of targeted prospects visiting your site you are still going to starve. What if I told you there was a source of traffic rich for the taking that people plunder everyday, a seam of traffic gold which people mine ruthlessly while everyone else who tries to use it just hits stone? Look I bet you already know about using articles to drive traffic to your site, at least in the traditional sense anyway, and you've probably tried submitting a few, only to get lousy results and give up. I'm here to end your article misery and allow you to tap straight into the heart of this incredible source of traffic. Articles have been a solid source of traffic, links and reputation for years, and the top article directories are going from strength to strength (as well as new ones popping up all the time!). What does that tell you? It tells me that article marketing is just as hot now as in the past, and that it is here to stay, oh sure videos are starting to get good traffic - but everyone and their dog can create a video and stick it up on those sites, so your video instantly gets drowned by 50 others in 10 seconds and nobody ever finds it. Articles allow you to hardwire into the other persons head, as they are reading YOUR article then they start to form opinions about you, they start to bond with you, they start to see you as an expert, which means by the time they hit your resource box then they already think of you as a person who can help them with the problems they have! That gives you superb quality, targeted traffic, not just junk traffic in huge numbers like most people pose about nowadays, I don't care if you can get 1000 visitors a day with some spammy technique and get lots of schoolchildren visiting your site, I want targeted traffic that converts into sales, I want eyeballs that want to see what I have to offer, not just figures to inflate my website stats so I can then turn around and sell people a course on how I got 1000 visitors a day with some crappy technique! Traffic is useless unless it is targeted and articles give you red hot targeted traffic! Here is what you could be learning just minutes from now! The two totally different ways to get traffic with articles and how to craft the perfect article for each way... (most people just use one way!) How to find out which day you need to submit on to get the maximum traffic in the shortest amount of time. My

3 step system to getting articles ranked in the search engines and funneling traffic to your site How to craft attention grabbing resource boxes that almost force people to click through to your site! (mess this part up and you might as well give up) How to write about topics you know absolutely nothing about in just minutes... The truth about spinning articles and how you should be doing it if you really want the articles to be usable! The web 2.0 sites you can use to supercharge your article marketing efforts How to write articles lightning fast and THEN how to increase your productivity by 50 as well... (this is simple but brutally effective!) and so much more! Imagine having an army of articles out there in all the corners of the internet funneling streams of unstoppable traffic to your site... Let's face it, getting traffic is hard, I have lost thousands on PPC, been scammed on PPV, I've struggled with SEO, and all the time I ignored the one source of traffic that has always reliably brought me traffic and sales for just 10 minutes work, articles. Writing articles is not sexy, most of the time it is not even fun, but if you want traffic then there are few better things you can do to get it. In fact I talk about how article marketing can not only bring you direct traffic, but can also bring you endless free traffic from the search engines as well! This leaves you free then to start a new site and repeat the process! While people are spending hundreds of dollars a day testing things out in PPC, then you can quietly siphon off traffic they would happily pay \$1, \$2, even \$3 a click for, and you can do it for free! Not to mention that as your article base grows then you'll be getting traffic from old articles possibly for years to come! Not every article sticks, in fact a lot will be duds, but with my system you can drastically cut down the failures and ramp up the winners until you couldn't stop the flow of traffic unless you tore down your site! People are submitting articles right now and taking traffic that could be yours! Think about it, if by reading this guide can get you just 100 people to visit your site, do you think you could make one \$30 commission off them? What about if you had 100 or 1000 articles out there following this method which pump traffic to your sites? Would it be worth it? I'm here to run a businessso I can't just give the information away for free, but then this UP TO DATE FOR 2010 information could help you out so much that I don't want to price it out of people's reach, so \$17 sounds fair to me, I get a fair pay for my work and you get your hands on some of the best article marketing information around at a pittance of its true worth. Look at it this way -- \$17 is really a painless drop in the bucket to be able to get your hands on the 'Article Cannon' and start using it right away to improve your business! Are you going to put in the effort so you can reap the rewards? Or just keep chasing that elusive 'secret' technique which requires no work? There's no doubt about it, writing articles takes time

and effort, but then anything that is worth it takes effort, people try and sell you secret systems everyday that require no effort and promise to make you rich, but they never work that way do they? I am giving you a way to get real traffic from real work, and make some real profits from it. P.S. Keep in mind that this is current and up to date material that works TODAY. Although article marketing is one of the workhorse methods of getting traffic and has been around for a while, this work is up to date for todays internet. P.P.S Every second you don't have this information you are missing out as more and more people submit article and drive traffic to THEIR sites - get your share now!
