Using My Tips Approach Solution... IAS Software Makes Your Content Achieve 90 Up To 100 Uniqueness In A Few Clicks! Dear Friend, I normally HATE writing long sales letters but for this one... You deserve an explanation and Im going to spill the beans right here, so bear with me as this will help you a lot in your business! Theres a very structured approach to always get a 100 uniqueness when you are writing and spinning content. Combined with this small piece of technology (IAS), duplicate content will NEVER be an issue if you follow the instructions that Ill be providing you on this page. You see, apart from trading in the IM niche, I also own many niche content sites (close to 200 sites) which are making me a decent income from adsense and affiliate marketing every month. So, as you probably know to handle content sites like these, you need to spend a lot of money on writers to get them to write fresh and unique articles every time... Whether its for my own sites or to build backlinks by submitting these spin content to other places. Added to this with the new Google Farmer Update, Google is hitting HARD on those duplicate content sites. So, if you were used to spin content at 30-50 uniqueness, its still NOT enough. Sooner or later, google will track down those articles and your backlinks wont count. The BIG Failures With The Traditional Way Of Spinning Content Lets face it, the traditional way of spinning content has MANY failures. Whether you use the best spinning software on the market or not, there will always be footprints to track down all your spun articles if ever you are going to use them to build backlinks. These footprints can be: (1) Your site url (2) The structure of the article (3) The same idea behind each spun paragraph And many more... Look, lets not fool ourselves... If YOU can easily notice the similarities, why would google not able to do so? But listen... Ive the solution to all these problems... Whats The Solution? YES... I call this the TIPS APPROACH... What is this all about? The idea is VERY simple... Instead of writing articles the traditional way, we build up a database of tips based on the niche topic. The beauty of using the tips approach is that each tip can stand alone and theres no need for a continuous flow in the article, yet the article will still be of very high quality Theres also an advanced module inside the shuffler where it groups together many paragraphs to build a SUPER ARTICLE which has been spun at an EXTREMELY high level. This was demonstrated in the video above. And now think about it for a

moment... If you apply my strategy, you WONT need to continuously spend a lot of money on writers in the long run. You WONT have to worry about duplicate content all the time when you are going to submit these super articles to build backlinks. Do you see how a SIMPLE idea solve all these frustrations? We are not re-inventing the wheel... we are just adding a little twist to those things that we are already doing to make it even more effective. So lets get to what exactly youll be receiving when you get this product today! Testimonials Big, big thanks for this powerful package. It contains all the things I need for article marketing. I have just created a totally unique article in ten minutes or less. I think, with this tool I can get the maximum from article marketing and create great content with ease for my websites. By the way, using tips for articles method is really good and make the article creation more easier and effective. Big thanks! And keep up the great work! Regards imi82 from warrior forum wpbay.net
